

Contents

VOLUME ONE

Keynote Presentations

An Overview of Paradigm Shifts in Coastal Engineering — Wave Pressure, Wave Transformations, and Sediment Transport	1
Yoshimi Goda	
Designing with Models	19
J.W. Kamphuis	
Coastal Zone Management — A Conundrum	33
Bruce G. Thom	

Part I Characteristics of Coastal Waves and Currents

An Approach to Measuring Turbulent Stresses in the Nearshore Region	48
Paolo Blondeaux, Timothy Stanton, Edward Thornton, and Giovanna Vittori	
Roller Momentum-Thickness and Residual Turbulence	59
William R. Dally	
Profiles of Void Fraction and Turbulent Dissipation Under Breaking Waves in the Surf Zone	70
Timothy P. Stanton and Edward B. Thornton	
A Two-Dimensional Multi-Scale Turbulence Model for Breaking Waves	80
Qun Zhao, Steven Armfield, and Katsutoshi Tanimoto	
Velocity Profiles Above and Within the Wave Bottom Boundary Layer over a Sloping Bottom	94
Qingping Zou and Alex E. Hay	
Bottom Stress in the Inner Surf and Swash Zone	108
Daniel T. Cox, William Hobensack, and Ashok Sukumaran	
A Unified Numerical Model for the Bottom Boundary Layer and the Upper Layer in the Surf Zone	120
Nguyen The Duy, Tomoya Shibayama, and Akio Okayasu	
A Model of Sediment Transport in the Bottom Boundary Layer	134
Tomoya Shibayama and Ioan Nistor	
A Boussinesq-Type Wave Model that Conserves Both Mass and Momentum	148
Mart Borsboom, Neelke Doorn, Jacco Groeneweg, and Marcel van Gent	
On the Accuracy of Boussinesq Evolution Equations	162
Henrik Bredmose, Per A. Madsen, and Hemming A. Schäffer	
The Ultimate Boussinesq Formulation for Highly Dispersive and Highly Nonlinear Water Waves	176
Per A. Madsen, Harry Bingham, and Hua Liu	
Boussinesq Type Modelling Using Unstructured Finite Element Technique	190
Ole René Sørensen and Lars Steen Sørensen	

Breaking Waves in Intermediate-depths with and Without Current.....	203
David Kriebel	
Bed Friction in Combined Wave-Current Flows.....	216
Richard Simons, Dag Myrhaug, Laurent Thais, Georges Chapalain, Lars-Erik Holmedal, and Ruairi MacIver	
Experimental Study of Wave Blocking.....	227
I.K. Suastika, M.P.C. de Jong, and J.A. Battjes	
Equilibrium Range Spectra of Wind Waves on Currents.....	241
Kyung Doug Suh, Sang Ho Oh, Sidney W. Thurston, and Noriaki Hashimoto	
1DV Simulation of Wave Current Interaction.....	255
R.E. Uittenbogaard	
A Saturation-Dependent Dissipation Source Term for Wind-Wave Modeling Applications: Fetch-Limited Case.....	269
Jose Henrique G.M. Alves and Michael L. Banner	
A Real-Time Coastal Monitoring and Forecasting System: Preliminary Results.....	283
Michael S. Bruno, Okey G. Nwogu, Kelly L. Rankin, and Thomas O. Herrington	
Measurement of the Initiation and Growth of Surface Water Waves Under the Action of a Laminar Air Flow.....	297
Antony J. Grass, Yuan S. Tsai, and Richard R. Simons	
Estimating Wave Height Distributions from Wind Speed Distributions.....	310
Chung-Chu Teng and Paul C. Liu	
Exchange of Horizontal Momentum in Combined Waves and Current.....	320
Rolf Deigaard	
Calculation of Wave-Induced Longshore Current in Surf Zone by Using Boussinesq Equations.....	334
Shaowu Li and Tomoya Shibayama	
Swell and Whitecapping, a Numerical Experiment.....	346
L.H. Holthuijsen, R.C. Ris, N. Booij, and E. Cecchi	
Wave Crest Kinematics of Deep Water Breaking Waves.....	355
Pål F. Lader, Dag Myrhaug, and Bjørnar Pettersen	
On the Strength of Breaking of Deep Water Waves.....	369
William L. Peirson and Michael L. Banner	
Physical and Numerical Study of 2-D Wave Breaking and Non-Linear Effects.....	382
Kostas Anastasiou and Jack Bokaris	
The Dissipation of Waves over a Rippled Bed.....	396
Ken Haste Andersen and Martin Lohmann	
Probability of Breaking Events in Shallow Water.....	403
M ^a Carmen Castillo and Miguel A. Losada	
Numerical Modeling of Fully Nonlinear 3D Overturning Waves over Arbitrary Bottom.....	417
Philippe Guyenne, Stéphan T. Grilli, and Frédéric Dias	

Wave Breaking Simulation for Multi-Directional Nonlinear-Dispersive Waves.....	429
Kazuo Nadaoka, Hitoshi Tamura, and Tetsushi Kiyokawa	
Morphodynamic Modelling of Rip Channels.....	441
Jesper Damgaard, Nick Dodd, Lisa Hall, and Tim Chesher	
Processes Governing Rip Spacing, Persistence, and Strength in a Swell Dominated, Microtidal Environment.....	454
Roshanka Ranasinghe, Graham Symonds, Kerry Black, and Rob Holman	
On the Formation of Rip Currents on a Plane Beach	468
G. Symonds and R. Ranasinghe	
Nonlinear Wave Equations over General Topography.....	482
Samir Abohadima and Masahiko Isobe	
Use of Phase-Resolving Wave Models in Bathymetry Deduction.....	495
Chandrasekher Narayanan and James M. Kaihatu	
Performance of Numerical Boundary Condition Based on Active Wave Absorption System.....	505
Peter Troch, Julien De Rouck, and Peter Frigaard	
Numerical Study of Solitary Wave Propagation in Curved Channels.....	519
Masatoshi Yuhi, Hajime Ishida, and Hajime Mase	
Statistical Distribution of Wave Heights in Finite Water Depth.....	533
Kyungmo Ahn	
Joint Distributions of Wave Height and Wave Steepness Parameters.....	545
Per A. Brodtkorb, Dag Myrhaug, and Håvard Rue	
The 1974 Storms Revisited: 25 Years Experience in Ocean Wave Measurement Along the South East Australian Coast	559
Douglas Lord and Mark Kulmar	
Evaluation of Design Waves for Coastal Protection Structures in the Wadden Sea.....	573
Ralf Kaiser, Bettina Weiler, and Hanz D. Niemeyer	
Bivariate Statistical Analysis of Wave Climates.....	583
A. Repko, P.H.A.J.M. Van Gelder, H.G. Voortman, and J.K. Vrijling	
Swash Hydrodynamics on Sand and Shingle Beaches	597
J.C. Blewett, P. Holmes, and D.P. Horn	
Pressure Fluctuations and a Mechanism of Sediment Suspension in Swash Zone.....	610
John R-C Hsu and Joe Ariyaratnam	
A Phase-Resolving Model of Sediment Transport on Coarse Grained Beaches.....	624
John Lawrence, Andrew Chadwick, and Chris Fleming	
Field Observations of Swash Zone Flow Patterns and 3D Morphodynamics.....	637
Jack A. Puleo, K. Todd Holland, Timothy N. Kooney, and Asbury H. Sallenger, Jr.	
Boussinesq Modeling of Waves and Longshore Currents Under Field Conditions.....	651
Qin Chen, James T. Kirby, Robert A. Dalrymple, Andrew B. Kennedy, Edward B. Thornton, and Fengyan Shi	
Nonlinear Wave Dynamics in Surf and Swash Zones.....	664
Zakaria Elnaggar and Akira Watanabe	

Improved Performance in Boussinesq-Type Equations	678
Andrew B. Kennedy, James T. Kirby, and Mauricio F. Gobbi	
Wave Damping due to Liquefied Sandbed and Wave-Induced Compaction — A Study on the Development of a Liquefied Sandbed Wave Barrier.....	692
Yoon-Koo Kang and Shigeo Takahashi	
Experimental Study on the Influence of Bottom Permeability on Wave Breaking and Associated Processes.....	706
I.J. Losada, J.L. Lara, and M.A. Losada	
Water Wave Interaction with Coarse Sediment.....	720
M.D. Patterson, D.H. Peregrine, and J. Loveless	
Breaking Shallow Water Wave Simulations in the Surf and Swash Zone.....	733
O. Bokhove, M.D. Patterson, and D.H. Peregrine	
Transformation of Irregular Waves in the Inner Surf Zone.....	745
Philippe Bonneton and Hélène Dupuis	
Numerical Simulation of Turbulent Air-Water Mixing Layer Withiu Surf-Zone.....	755
Hidemi Mutsuda and Takashi Yasuda	
Variations of Orbital Velocity and Undertow in the Nearshore Zone.....	769
Akira Watanabe and Zakaria Elnaggar	
Investigation of Wave-Wave Interactions with Spectral Modelling.....	783
Richard Gorman, Murray Smith, and Cameron Neilson	
Modelling of Non-Linear Quadruplet Wave-Wave Interactions in Operational Wave Models	797
Gerbrant Ph. van Vledder, Thomas H.C. Herbers, Robert J. Jensen, Don T. Resio, and Barbara Tracy	
Analysis of SWAN Model with In Situ and Remotely Sensed Data from Sandy Duck '97	812
W. Erick Rogers, Paul A. Hwang, David W. Wang, and James M. Kaihatu	
Modeling Waves at Willapa Bay, Washington	826
Jane McKee Smith, Hugo E. Bermudez, and Bruce A. Ebersole	
Modulated Shear Flow	840
Asunción Baquerizo, Miquel Caballeria, Miguel A. Losada, and Albert Falqués	
Effect of Submerged Vegetation upon Wave Damping and Run-Up on Beaches: A Case Study on <i>Laminaria Hyperborea</i>	851
Stig Magnar Løvås and Alf Tørum	
Wave Attenuation by Emergent Wetland Vegetation	865
Paul Tschirky, Kevin Hall, and David Turcke	
Effects of Seagrass on Nearshore Current and Wave Dynamics.....	878
Stephanie Wallace and Ron Cox	
A Study of Plunging Breaker Mechanics by Particle Image Velocimetry (PIV) Measurements and a Navier-Stokes Solver	891
Narumon Emarat, Erik D. Christensen, David I.M. Forehand, and Stefan Mayer	

Determination of Internal Characteristics of Breaker Deformation Using a Particle Image Velocimetry (PIV) Technique that Satisfies the Mass Conservation Law.....	902
Fumihiko Yamada and Kiyoshi Takikawa	
A Three-Dimensional Model Based on Navier-Stokes Equations for Wave Breaking.....	916
Bin Li and Chris A. Fleming	
Simulation of Breaking Waves in the Surf Zone Using a Navier-Stokes Solver.....	928
Stefan Mayer and Per A. Madsen	
Three-Dimensional Large-Scale Eddies of Breaking Waves.....	942
Yasunori Watanabe, Mikio Yasuhara, and Hiroshi Saeki	

VOLUME TWO

Long Period Wave Effects as Measured by a Dual Frequency Differential Global Positioning System (DGPS) Buoy.....	953
J. Davies	
Hydrodynamics and Design of a Unique Gravity Base for a Tethered Control Buoy.....	965
Manfred Kloos, André van Tonder, André Bartels, Simon Allen, Greg Moore, Hans Moes, and Jacques van Aswegen	
An Absorbing Multidirectional Wavemaker for Coastal Applications.....	981
Hemming A. Schäffer, Jesper U. Fuchs, Peter Hyllested, Niels Mathiesen, and Benny Wollesen	
Second-Order Wave Generation in Laboratory Bassins.....	994
Cathrine M. Steenberg and Hemming A. Schäffer	
Wave Kinematics and Wave Bottom Pressures in the Surf Zone.....	1008
Øivind A. Arntsen, Tom Lilleås, Franziska Kuhnen, Andreas Menze, Matthias Löbermann, and Alf Tørum	
Free Surface Statistics and Probabilities in Surf Zones on Beaches.....	1022
Bradley D. Johnson and Nobuhisa Kobayashi	
Modelling of Digital-Imaged Water Levels and Flow Fields in the Surf Zone.....	1036
G. Mocke, K. Govender, M. Alport, F. Smit, and G. Diedericks	
Calculation of Wave-Driven Currents in a 3D Mean Flow Model.....	1050
D.J.R. Walstra, J.A. Roelvink, and J. Groeneweg	
Extreme Significant Wave Heights from Combined Satellite Altimeter Data.....	1064
Jose Henrique G.M. Alves and Ian R. Young	
Population Distribution of Extreme Wave Heights Estimated Through Regional Analysis.....	1078
Yoshimi Goda, Osamu Konagaya, Naoki Takeshita, Hisashi Hitomi, and Toshihiko Nagai	
Wavelet Spectrum of Freak Waves in the Ocean.....	1092
Paul C. Liu and Nobuhito Mori	
Regional Frequency Analysis of Extreme Wave Heights: Trading Space for Time.....	1099
Pieter van Gelder, John de Ronde, Neyko M. Neykov, and Plamen Neytchev	

3-D Modeling of Rip Currents.....	1113
Kevin A. Haas, Ib A. Svendsen, and Qun Zhao	
Analysis of Rip Current Systems.....	1127
Ib A. Svendsen, Kevin A. Haas, and Qun Zhao	
Ship Waves in a Shallow and Narrow Channel.....	1141
Katsutoshi Tanimoto, Hidetaka Kobayashi, and Vu Thanh Ca	
Maximum-Entropy Probability Distribution of Free-Surface Elevations of Wind-Generated Coastal Waves.....	1155
Witold Cieřlikiewicz	
Prediction of Waves and Sea Surface Roughness in Restricted Coastal Waters.....	1169
Henrik Kofoed-Hansen, Hakeem K. Johnson, Poul Astrup, and Jacob Larsen	
A Probabilistic Generation Model of Parametric Low Pressure Systems and Its Application to the Estimation of Extremes of Winds and Waves.....	1183
Hirokazu Nonaka, Masataka Yamaguchi, and Yoshio Hatada	
Determining Water Depths from Surface Images Using Boussinesq Equations.....	1197
S.K. Misra, A.B. Kennedy, J.T. Kirby, and R.A. Dalrymple	
Surf Zone Imaging with a Moored Video System.....	1211
Satoshi Takewaka and Takashi Nakamura	
Application of Standardized Bimodal Directional Spectra to Field and Laboratory Data	1217
Ryuichi Fujiwara, Masahiko Isobe, Toshiya Kyono, Toshio Aono, and Yasuo Kotake	
A Combined Probability Density Function (PDF) of 3-D Irregular Wave Amplitudes and Their Directions of Propagation.....	1231
Akira Kimura	
Assessing the Quality of Directional Wave Measurement by a Differential GPS Buoy.....	1240
M. Rossouw, A van Tonder, U von St Ange, L. Coetzee, and J. Davies	
Transient Evolution of the Wave Bimodal Directional Distribution.....	1254
David W. Wang and Paul A. Hwang	
Time-Dependent Eddy Viscosity Models for Wave Boundary Layers.....	1268
Rafik Absi	
A Simple Method for Evaluating Undertow Velocity Distributions over Arbitrary Beach Forms.....	1282
Daisuke Aoike, Akira Watanabe, and Masahiko Isobe	
Modeling Wave Transformation in the Surf Zone.....	1293
Jayaram Veeramony and Ib A. Svendsen	
Extended Eddy Viscosity Concept for Wave Breaking in Boussinesq Type Models....	1307
Jann Strybny and Werner Zielke	
On the Consistency of Boussinesq Models and Their Ability to Predict Vertical Vorticity Fields.....	1321
Mauricio F. Gobbi, James T. Kirby, and Andrew B. Kennedy	

The Application of Third-Generation Models in Coastal Engineering Studies.....	1335
Noemie Durand, Nigel P. Tozer, and N. William W. Allsop	
Estimation of Directional Spectra from HF/VHF Radar Surface Backscatter.....	1349
Noriaki Hashimoto, Shoichiro Kojima, and Masayuki Tokuda	
Directional Wavenumber Spectra of Ocean Surface Waves.....	1363
Paul A. Hwang, Ian R. Young, David W. Wang, Erick Rogers, James Kaihatu, Edward J. Walsh, William B. Krabill, and Robert N. Swift	
Wave Transformations on Coral Reefs.....	1372
Seiko Tsukayama and Eizo Nakaza	
Parameterization of Velocity Skewness Under Waves and Its Effect on Cross-Shore Sediment Transport.....	1383
John C. Doering, Berry Elfrink, Daniel M. Hanes, and Gerben Ruessink	

Part II Long Period Waves, Storm Surges, and Wave Groups

Surf Beat Generation by a Time-Varying Breakpoint.....	1398
T.E. Baldock, D.A. Huntley, P.A.D. Bird, T.J. O'Hare, and G.N. Bullock	
Observations of Surf Beat Propagation and Energetics.....	1412
Stephen M. Henderson, Steve Elgar, and A.J. Bowen	
Generation of Long Wave Energy in Coastal Bays	1422
Jon B. Hinwood and Errol J. McLean	
Designing for Low Frequency Waves.....	1434
J.W. Kamphuis	
Free Long Wave-Short Wave Interaction in a Surf Zone	1448
T.J. O'Hare, T.E. Baldock, D.A. Huntley, P.A.D. Bird, and G.N. Bullock	
Forced and Free Long Waves Generated by Winter Storms and Typhoons	1462
Shinji Sato and Masahiro Kasai	
Estimating Infragravity Wave Properties from Pressure-Current Meter Array Observations	1476
A. Sheremet, R.T. Guza, S. Elgar, and T.H.C. Herbers	
Advances in Understanding Sea-Level Variability Around New Zealand.....	1490
Robert G. Bell, Derek G. Goring, and Roy A. Walters	
Simulation and Experiment of Hydrodynamic Pressure on a Tsunami Barrier.....	1501
M.A. Hamzah, Hajime Mase, and Tomotsuka Takayama	
Modeling Sediment Transport due to Tsunamis with Exchange Rate Between Bed Load Layer and Suspended Load Layer.....	1508
Tomoyuki Takahashi, Nobuo Shuto, Fumihiko Imamura, and Daisuke Asai	
Evaluation of Design Water Levels and Design Wave Run-Up for an Estuarine Coastal Protection Master Plan.....	1520
Hanz D. Niemeier and Ralf Kaiser	

Part III Coastal Structures

Physical Modeling of Dolos Breakwaters: The Coega Results and Historical Perspective.....	1536
Anton H. Holtzhausen, Gideon de F Retief, and Joop A. Zwamborn	

Correlation between Model and Prototype Damage of Dolos Breakwater Armouring	1550
D. Phelps and J.A. Zwamborn	
Core-loc™ Repair of Dolos-Armored Jetties at Manasquan Inlet, New Jersey	1563
George F. Turk	
Damage Development on Stone-Armored Rubble Mounds	1571
J.A. Melby and N. Kobayashi	
Stability of Rubble-Mound Breakwaters Under Seismic Action	1585
Constantine Memos, George Bouckovalas, and Alexandros Tsiachris	
Filter Erosion in Coastal Structures	1599
G. J. Schiereck, H.L. Fontijn, K. d'Angremond, R. Booij, and B. Steijn	
Design Considerations of Berm Breakwaters	1610
Sigurdur Sigurdarson, Omar Bjarki Smarason, and Gisli Viggosson	
Wave Loads on Perforated Caisson Breakwaters	1622
Hendrik Bergmann and Hocine Oumeraci	
Hazard Analysis of Dynamically Loaded Caisson Breakwaters	1636
L. Martinelli, H.G. Voortman, A. Lamberti, and J.K. Vrijling	
Nonlinear Wave-Induced Instability in a Caisson-Type Breakwater Having a Multi-Layered Base	1650
Ayman M. Mostafa and N. Mizutani	
Probabilistic Design of Caisson Breakwaters and Sea Walls — Present Status and Perspectives	1664
H. Oumeraci, A. Kortenhaus, N.W.H. Allsop, M.B. de Groot, R.S. Crouch, and J.K. Vrijling	
Technical Discoveries from the Cherbourg Breakwater	1678
Billy L. Edge, Orville T. Magoon, Pierre-Yves Liagre, and Stéphane Macquet	
The Half-Loc: Optimized Middle Armor Block	1688
Hyuck-Min Kweon and Dal-Soo Lee	
Scale Effects on Scale Tests of Crown Walls	1696
F.L. Martín, C. Vidal, I.J. Losada, and C. Martínez	
Effect of Random Multidirectional Wave Fields on Wave Loads on Vertical and Composite Breakwaters	1710
Mario Calabrese, William Allsop, and Mariano Buccino	
Damping of Horizontal and Uplift Forces on Horizontally Composite Breakwaters	1724
A. Kortenhaus and H. Oumeraci	
Effect of Directional Occurrence Distribution of Extreme Waves on Composite Breakwater Reliability in Sliding Failure	1738
Tomotsuka Takayama, Shun-Ichi Ikesue, and Ken-Ichiro Shimosako	
Numerical Modeling of Impact Pressure Propagation in Cracks	1751
Gerald Müller, Mark Cooker, William Allsop, Tom Bruce, Leopoldo Franco, and Philip Hull	

Field Wave and Current Model Testing for Pipelines	1763
Peter Riedel and Paul O'Brien	
Vortex Formation Behind a Vertical Slender Plate and Wave Force.....	1773
Takehisa Saitoh and Hajime Ishida	
Breaking Wave Impact on a Slender Cylinder.....	1787
Jan Wienke, Uwe Sparboom, and Hocine Oumeraci	
Artificial Reefs for Coastal Protection — Transient Viscous Computation and Experimental Evaluation	1799
Günther F. Clauss and Rolf Habel	
Successful Implementation of an Offshore Reef Scheme.....	1813
Chris Fleming and Ben Hamer	
Submerged Breakwaters and "Bars": From Hydrodynamics to Functional Design	1821
A. Sánchez-Arcilla, X. Gironella, D. Vergés, J.P. Sierra, C. Peña, and L. Moreno	
Predicted and Observed Coastline Changes at the Gold Coast Artificial Reef.....	1836
Ian L. Turner, Vincent M. Leyden, Graham Symonds, John McGrath, Angus Jackson, Tony Jancar, Stefan Aarninkhof, and Irv Elshoff	
Large-Scale Experiment on Dynamic Response of Sand Bed Around a Cylinder due to Tsunami.....	1848
Fuminori Kato, Shinji Sato, and Harry Yeh	
Wave Scour around Piles	1860
José Carreiras, Philippe Larroudé, Fernando Seabra-Santos, and Mathieu Mory	
The Block Armored Caisson-Type Seawall	1871
Koji Iwase, Tsuyoshi Ikeya, Shoichi Abe, Hayato Notoya, and Hideki Amano	
Application of Expected Sliding Distance Method for Composite Breakwaters Design	1885
Kenichiro Shimosako and Shigeo Takahashi	
Typical Failures of Composite Breakwaters in Japan.....	1899
Shigeo Takahashi, Ken-ichiro Shimosako, Katsutoshi Kimura, and Kojiro Suzuki	
Stability Relations of Rip-Rap Revisited	1911
K. d'Angremond, G.J. Schiereck, H.L. Fontijn, and M.R.A. Van Gent	
An Alternative Stability Equation for Rock Armoured Rubble Mound Breakwaters	1921
T. Hald and H.F. Burcharth	

VOLUME THREE

Stability of Rubble Mound Breakwaters Using High Density Rock.....	1935
Einar Helgason, Hans F. Burcharth, and Jørgen Bülow Beck	
Stability of Armour Units on Breakwater Heads Under Multidirectional Waves.....	1946
Yoshiharu Matsumi, Akira Kimura, and Kenichi Ohno	

How Safe are Blockwork Breakwaters and Seawalls Against Wave Attack?.....	1959
Tom Bruce, William Allsop, Mark Cooker, Leopoldo Franco, and Gerald Müller	
Influence of Ageing and Wide Wave Spectra on Stability of Placed Block Revetments	1970
Mark Klein Breteler, Krystian W. Pilarczyk, and Robert 't Hart	
Design and Re-Use of Placed Block Revetments.....	1983
Judith Litjens-van Loon, Harry de Looft, and Mark Klein Breteler	
The Structural Analysis of the Block Revetment on the Dutch Dikes.....	1991
J.K. Vrijling, C. van der Horst, P. van Hoof, and P.H.A.J.M. van Gelder	
Time-Averaged Probabilistic Model for Irregular Wave Runup on Coastal Structures	2004
Peter G. Kearney and Nobuhisa Kobayashi	
Prototype Run-Up Velocities at Zeebrugge Breakwater	2018
H.Schüttrumpf, P. Troch, B. Van de Walle, J. de Rouck, and H. Oumeraci	
Wave Run-Up on Dikes with Shallow Foreshores	2030
Marcel R.A. van Gent	
Wave Run-Up on Sloping Seadykes and Revetments.....	2044
Joachim Grüne and Zeya Wang	
Horizontal Coherence of Wave Forces on Vertical Wall Breakwaters.....	2058
Renata Archetti, Luca Martinelli, Peter Frigaard, and Alberto Lamberti	
Pressure Distribution at the Front Face and the Bottom of a Vertical Breakwater in Multidirectional Seas	2072
A. Schüttrumpf, A. Kortenhaus, H. Oumeraci, and L. Martinelli	
Numerically Simulating Seawall Overtopping.....	2086
Derek Causon, David Ingram, Clive Mingham, Jun Zang, Keming Hu, and Jian Guo Zhou	
Gridless Numerical Analysis of Wave Breaking and Overtopping at Upright Seawall.....	2100
Minoru Hayashi, Hitoshi Gotoh, Tetsu Memita, and Tetsuo Sakai	
Effects of Bi-Modal Waves on Overtopping: Application of UK and Dutch Prediction Methods.....	2114
A.B. Mendez Lorenzo, J.W. van der Meer, and P.J. Hawkes	
Splash-up and Overtopping of Shoreline Structures.....	2128
Fredric Raichlen, Ying Li, Ying Poon, and Russell Boudreau	
Effect of Wave Groups and Wind Speed to Wave Overtopping.....	2142
Yamamoto Yoshimichi, Vu Thanh Ca, Katsutoshi Tanimoto, and Hiroshi Sakuramoto	
Wave Transmission: Spectral Changes and Its Effects on Run-Up and Overtopping	2156
J.W. van der Meer, E. Regeling, and J.P. de Waal	
Acceleration and Pressure Measurements During Wave-Structure Interactions.....	2169
Kuang-An Chang, Monroe Weber-Shirk, Edwin A. Cowen, Philip L.-F. Liu, and Aaron R. Blake	

Wave Transformation on the Foreshore of Coastal Structures	2178
M. Muttray and H. Oumeraci	
Observations of Long Waves on a Uniform Slope	2192
T.T. Janssen, J.W. Kamphuis, A.R. Van Dongeren, and J.A. Battjes	
Evaluating Structural Failure in Recent Coastal Engineering Constructions: Latent Defects Insurance as Part of a Risk Control Strategy	2206
Richard Dedeyne, Wim Van Alboom, and Luc Van Damme	
Study on Practical Application of a Non-Wave Overtopping Type Seawall.....	2215
Yuji Kamikubo, Keisuke Murakami, Isao Irie, and Yoshihiro Hamasaki	
Statistical Characteristics of Sea Walls Damaged by Storm Waves.....	2229
Tomohiro Yasuda, Hajime Mase, and Tomotsuka Takayama	
The Void Porosity of Rock Armour in Coastal Structures with Reference to Measurement and Payment Issues	2240
John-Paul Latham, Simon Newberry, Martin Mannion, Jonathan Simm, and Terry Stewart	
Performance Characteristics of a Rapidly Installed Floating Breakwater	2254
Michael J. Briggs, Zeki Demirbilek, Thad Pratt, Donald T. Resio, and Jun Zhang	
Floating Breakwaters for Small Boat Marina Protection.....	2268
C.D. Christian	
Wave-Induced Vortices Around a Submerged Breakwater by Fiber Laser Doppler Velocimetry (FLDV) and Particle Image Velocimetry (PIV).....	2278
Tai-Wen Hsu, Shan-Hwei Ou, Ho-Shong Hou, and Chih-Yung Shin	
Analytical Model of the Response of a Composite-Type Caisson Breakwater and Seabed to Waves	2292
Takahiro Kumagai and Mostafa A. Foda	
Mach Reflection of Random Waves	2306
Hajime Mase, Masatoshi Yuhi, and Toshikazu Kitano	
Modelling of a Wave-Induced Vortex Near a Breakwater	2318
Dorlisa Hommel, Fengyan Shi, James T. Kirby, Robert A. Dalrymple, and Qin Chen	
Research on Geocontainers and Its Application in Practice.....	2331
Adam Bezuijen, Henk den Adel, Maarten B. de Groot, and Krystian W. Pilarczyk	
New Geotextile Developments with Mechanically-Bonded Nonwoven Sand Containers as Soft Coastal Structures	2342
Georg Heerten, Angus Jackson, Simon Restall, and Fokke Saathoff	
Groundwater Waves and Water Exchange in Beaches	2356
Peter Nielsen and Ian L. Turner	
Field Observation of Lowering of Groundwater Level by Application of Beach Management System at Chigasaki Beach in Kanagawa Prefecture, Japan.....	2364
Takaaki Uda, Susumu Nishimura, and Ko-ichi Hirano	

Investigations of Vertical Distribution of Suspended Sediments During Field Experiment Novomikhailovka '99	2378
Igor S. Podymov, Ruben D. Kos'yan, and Nikolay V. Pykhov	
Vertical Sorting of Suspended Sediment Particles in the Nearshore Zone	2389
Alexander Khabidov, Konstantin Maroussine, and Irina Aksenova	
<i>Part IV Coastal Processes and Sediment Transport</i>	
Predicting Shoreline Change at Decadal Scale in the Pacific Northwest, USA	2400
George M. Kaminsky, Maarten C. Buijsman, and Peter Ruggiero	
El Niño and La Niña: Erosion Processes and Impacts	2414
Paul D. Komar, Jonathan Allan, Guillermo M. Díaz-Méndez, John J. Marra, and Peter Ruggiero	
Coastal Steepening in Denmark	2428
C. Laustrup, H. Toxvig Madsen, S. Bjerre Knudsen, and P. Sørensen	
Beach Oscillation, Rotation and the Southern Oscillation, Narrabeen Beach, Australia	2439
Andrew D. Short, Arthur C. Trembanis, and Ian L. Turner	
Intra-Wave Sediment Transport Modelling	2453
Judith Bosboom and Gert Klopman	
Sediment Transport Under Breaking Waves	2467
E.D. Christensen, J.H. Jensen, and S. Mayer	
Sand Transport by Waves and Currents: Predictions of Research and Engineering Models	2481
A.G. Davies and C. Villaret	
Shoreface Sand Supply to Beaches	2495
Peter J. Cowell, Marcel J.F. Stive, Peter S. Roy, George M. Kaminsky, Maarten C. Buijsman, Bruce G. Thom, and L. Don Wright	
An Equilibrium Grain Size Distribution Model for Beaches	2509
J. Galofré and R. Medina	
Verification of a Cross-Shore Profile Model Using Field Data	2522
Bart T. Grasmeyer, Leo C. Van Rijn, Steve Elgar, and Edith Gallagher	
Theoretical Study on Beach Profile Evolution Including Swash Zone	2536
Yoshiaki Kawata and Akihiro Kimura	
A Field Study of Wind-Blown Sand at the Niigata Coast	2547
Shin Hashimoto, Yasuro Ohtani, Shinji Satoh, and Shintaro Hotta	
Sand Transport Rate Predictions Using a Two-Phase Flow Model	2561
C. Villaret, A.G. Davies, and J.M. Frey	
Aerodynamic Granular-Material Model of Wind-Blown Sand Layer	2575
Abbas Yeganeh-Bakhtiary, Eiji Harada, Hitoshi Gotoh, and Tetsuo Sakai	
Relationship Between Beach Morphodynamics and Equilibrium Profiles	2589
R. Medina, A.M. Bernabeu, C. Vidal, and M. González	
Compaction Effect on Beach Stabilization	2602
Ryuichiro Nishi, Michio Sato, and Takaaki Uda	

A Beach Profile and Sea-Bottom Interface Observation Under Stormy Conditions	2615
Hideaki Noda, Takao Yamashita, Masamitsu Kuroiwa, and Kentaro Kuroki	
Nonlinear Interaction of Nearshore Morphology	2624
Nathaniel G. Plant and Suzanne J.M.H. Hulscher	
Dune Profile Evolution due to Overwash	2634
Yukiko Tega and Nobuhisa Kobayashi	
Bedform Migration on a Sheltered Sandy Beach in Southwestern Australia	2648
Jeffrey S. Doucette	
Can We Predict the Growth of Sand Waves? Hindcast of a Field Experiment in the Bisanseto Sea, Japan	2661
Michiel A.F. Knaapen, Suzanne J.M.H. Hulscher, and Olaf Scholl	
The Effect of Bedforms on Coastal Sediment Transport	2672
Andrew Saulter, Paul Russell, and David Huntley	
Ripple Geometry Under Severe Wave Conditions	2686
John F.A. Sleath	
NLINE: Efficient Modeling of 3-D Beach Change	2700
Mohamed Dabees and J. William Kamphuis	
Hydrodynamic Validation of Delft3D with Field Measurements at Egmond	2714
E.P.L. Elias, D.J.R. Walstra, J.A. Roelvink, M.J.F. Stive, and M.D. Klein	
Three-Dimensional Beach Deformation Model for Nonlinear Multi-Directional Waves	2728
Hiroshi Kobayashi, Akira Watanabe, Masahiko Isobe, Shinji Sato, and Toshimasa Ishii	
3-D Analysis of Barrier Island Morphologic Change	2740
E.K. Judge, M.F. Overton, and J.S. Fisher	
Moving Layer Thickness and Transport Rate of Graded Sand	2752
Mohammad Dibajnia and Akira Watanabe	
Vertical Grading of Mixed-Size Grains in Sheetflow Regime Under Oscillatory Flow	2766
Tetsuo Sakai, Hitoshi Gotoh, Kazuya Oki, and Tomohiro Takahashi	
Vertical Sorting of Graded Sediment by Waves and Currents	2780
Paul G.J. Sisternans, Jan van de Graaff, and Leo C. van Rijn	
Development and Application of a Geomorphic Model for Analysing (Shoreline Change and) the Impacts of Coastal Protection	2794
Kevin Burgess, Andrew Parsons, Helen Jay, Simon Burchett, and Steven Mitchell	
Simulating Coastal Evolution Using a New Type of N-line Model	2808
Hans Hanson and Magnus Larson	
Shoreline Response to Harbour Developments in Table Bay	2822
G.G. Smith, E. Dunkley, and C. Soltau	
Wave-Related Suspended Sand Transport in the Ripple Regime	2836
Dang Huu Chung, Bart T. Grasmeijer, and Leo C. Van Rijn	

On the Predictability of Suspended Sediment Pulses Under Non-Breaking Waves Using Groupiness' Simple Parameters	2850
José A. Jiménez, Antonio Arabi, Roberto Torres, Jan van de Graaf, and Agustín Sánchez-Arcilla	
A Sediment Pickup Rate Formula Based on Energy Dissipation Rate by Random Breaking Waves	2859
Hiroyuki Katayama and Yoshimi Goda	
Suspended Sediment Concentration over Ripples.....	2873
Hyoseob Kim, Brian A. O'Connor, Tae Hyung Kim, and Jon J. Williams	
Time Variations of Suspended Sediment Concentration Under Irregular Waves.....	2886
Ruben D. Kos'yan, Nikolay V. Pykhov, and Pavel L. Vorob'yev	
Fractal Behaviour in Nearshore Processes.....	2901
Giovanni Coco, David A. Huntley, Gerhard Masselink, Tim J. O'Hare, and Charitha B. Pattiaratchi	
Numerical Prediction of Bottom Topographical Change Around Coastal Structures Using Quasi-3D Nearshore Current Model.....	2914
Masamitsu Kuroiwa, Hideaki Noda, Chang-Bae Son, Kenichi Katoh, and Susumu Taniguchi	
Experiences with Physical Scale Basin Modelling Using Mobile Sediments.....	2928
Alexander F. Nielsen, Ian L. Turner, Brett M. Miller, Vincent Leyden, and Angus D. Gordon	
Long-Term Modelling of the Holland Coast Using a Multi-Layer Model.....	2942
Henk J. Steetzel, Hans de Vroeg, Leo C. van Rijn, and Jean-Marie Stam	
Bottom Sediment Suspension due to Wave-Current Effects at the Mouth of the Columbia River, USA	2956
Hans R. Moritz, Jarrell W. Smith, Nicholas C. Kraus, and Joe Z. Gailani	
Highly-Resolved Large-Eddy Simulation of Sediment Concentration Patterns over a Wavy Bed in the Presence of a Current.....	2970
Emily A. Zedler and Robert L. Street	

VOLUME FOUR

Parameterization of Sediment Concentrations and Transport over Sharp Crested Ripples	2981
K. Trouw, J. Monbaliu, and R. Padilla-Hernandez	
Time-Averaged Distributions of Velocity and Sediment-Concentration Under Irregular Waves and Currents	2995
Motohiko Umeyama and Jan van de Graaff	
Assessing Bed Stability at Coastal Structures with External Turbulence.....	3008
Richard Whitehouse and Jesper Damgaard	
Beach Profile Evolution due to Oblique Wave Attack.....	3021
Berry Elfrink, Ida Brøker, and Rolf Deigaard	
Probabilistic Assessment of Beach and Dune Changes	3035
Asbury H. Sallenger, Jr., Hilary Stockdon, John Haines, William Krabill, Robert Swift, and John Brock	

Prediction of Storm-Built Beach Profile Parameters Using Neural Network.....	3048
Ching-Piao Tsai, John R-C Hsu, and Kuan-Long Pan	
Profile Changes due to a Fortnightly Tidal Cycle.....	3062
J.J. Muñoz-Pérez and R. Medina	
Beach Volume Changes on a Meso-Tidal Sandy Coast	3076
Arjan de Boer	
Estimation of Sediment Transport Modes over a Wide Coastal Area by Mineralogical Analysis	3088
Jae Hyeng Lee, Isao Irie, Nobuyuki Ono, and Keisuke Murakami	
A Probabilistic Process Model of Cliff Recession.....	3100
Mike Walkden, Jim Hall, Ian Meadowcroft, and Stuart Stripling	
Performance of Longshore Sediment Transport Formulas Evaluated with Field Data	3114
Atilla Bayram, Magnus Larson, Herman C. Miller, and Nicholas C. Kraus	
Cross-Shore Distributions of Longshore Sand Transport Rate in Surf and Swash Zones	3128
Yuji Nakamura, Akira Watanabe, and Masahiko Isobe	
STRAND — A Model for Longshore Sediment Transport in the Swash Zone.....	3139
Erik Van Wellen, Tom Baldock, Andrew Chadwick, and David Simmonds	
Nearshore — Inner Shelf Sediment Exchange on the NSW Central Coast.....	3151
Peter Evans, David Hanslow, Aaron Coutts-Smith, and Zai-Jin You	
Cross-Shore Sand Transport on Beaches.....	3165
Nobuhisa Kobayashi, Bradley D. Johnson, and Entin A. Karjadi	
Importance of Wave Skewness in an Intra-Wave Cross-Shore Sediment Transport Model	3179
K.A. Rakha and R. Deigaard	
Cross-Shore Sediment Transport Indices.....	3193
Jamie MacMahan and Robert J. Thieke	
Three-Dimensional Near-Shore Bar Morphology.....	3205
Nils Drønen and Rolf Deigaard	
Morphodynamic Response to Wave Group Forcing	3218
Ad Reniers, Dano Roelvink, and Ap van Dongeren	
Normal Mode Analysis of the Surf Zone Morphodynamics	3229
F. Ribas, A. Falqués, and A. Montoto	
Criteria to Assess the Impact of Sand Volume Removed on the Nearshore Wave Climate	3243
David R. Basco and Takashi Okamoto	
TRIDISMA — 3-D Sediment Transport Measurements by Acoustics.....	3254
C.E. Vincent, L. Bjørnø, C.M. Dohmen-Janssen, D. Guyomar, V. Humphrey, M. Perrenes, J.S. Ribberink, A. Schaafsma, J.A. Taylor, and P. Thorne	

Near-Bed Sand Transport Mechanisms Under Waves: A Large-Scale Flume Experiment (SISTEX99)	3263
Jan S. Ribberink, C. Marjolein Dohmen-Janssen, Daniel M. Hanes, Steve R. McLean, and Chris Vincent	
Sediment Pick-Up Function for High Velocities: Experimental Evaluation	3277
G.J. Mulderij-Meijer, T.D.S. Feenstra, W.T. Bakker, P.J. Visser, and W.G.M. van Kesteren	
Video-Based, Quantitative Assessment of Intertidal Beach Variability	3291
Stefan G.J. Aarninkhof, Mark Caljouw, and Marcel J.F. Stive	
Storm Damage Reduction Potential via Beach Nourishment	3305
Robert G. Dean	
Fifty Years of Experience with the Implementation of Artificial Sand Nourishment Techniques on the East Frisian Barrier Islands, Germany	3319
Hans Kunz and Hans-J. Stephan	
Performance of Gravel Nourishment for Erosion Control at Fuji Coast	3333
Toshimitsu Takagi, Shinji Satoh, Kouji Yamamoto, Wataru Sakurai, Ukihiro Murano, Yuji Atsuzaka, and Yan Ding	
Three Dimensional Velocity Structure and Suspended Sediments at Coral Reefs in Teluk Banten, Indonesia	3345
A.J.F. (Ton) Hoitink	
Field Experiments on Temporal Change of Suspended Sediment Concentration and Grain Size Distribution in Surf Zone	3359
Akio Okayasu and Hiroyuki Katayama	
Detailed Tidal Field Measurements of Suspended Sediment Transport Parameters	3373
Christopher P. Rose, Peter D. Thorne, and Brian A. O'Connor	
Field Measurements of Flow and Sediment Transport over Complex Bed Morphology	3384
J.J. Williams, P. Bell, P.D. Thorne, and J.D. Humphery	
Measurements of Flow Velocity and Sediment Transport in a Rip Current	3395
Robert W. Brander	
Inverse Methods in Coastal Morphology	3409
D.E. Reeve and M. Spivack	
Q-Tree Model of Nearshore Flows at Multi-Cusps	3419
