

ICCE 2004 LISBON

CONTENTS

[Volume 1](#) (p1)

[Volume 2, Long Waves, Nearshore Currents, and Swash](#) (p1119)

[Volume 3, Coastal Management, Dredging, and Beach Nourishment](#) (p2941)

[Volume 4, Coastal Structures](#) (p3467)

VOLUME ONE

Keynote	1
Forty Years of Coastal Engineering in Portugal I. B. Mota Oliveira.....	3
Waves	41
Waves in Numerical and Physical Wave Flumes - A Deterministic Combination Haiwen Zhang and Hemming Schäffer.....	43
Computation of Nonlinear Water Waves with a High-Order Boussinesq Model David R. Fuhrman, Per A. Madsen and Harry B. Bingham	56
The Evolution of Large Waves in Shallow Water Vasiliki Katsardi and Chris Svvan	69
A Multi-Layer Approach to Boussinesq-Type Modeling P. Lynett, P. L.-F. Liu and H.-H. Hwung.....	82
A Numerical Solution of the Boussinesq Equations Based on a Godunov-Type FVM Suzana Ilic, Kutsi Erduran and Vedrana Kutija	94
2D Higher Order Boussinesq Equations for Waves in Flows with Vorticity Z. L. Zou, J. T. Kirby and F. Y. Shi	106
A Discrete Spectral Evolution Model for Nonlinear Waves over 2D Topography T. T. Janssen, T. H. C. Herbers and J. A. Battjes.....	119
Another Step Towards a Post-Boussinesq Wave Model Hemming Schäffer	132
Experiments on the Front of Continuous Wavetrains in a Large Wave Tank Wen-Son Chiang, Hwung-Hweng Hwung and Yu-Hsuan Chang.....	145
Side-band Evolution of Initially Uniform Deep Water Wave H. H. Hwung, W. S. Chiang, P. L.-F. Liu and P. Lynett	157

Nonlinearity in Irregular Waves from Linear LAGRANGEian Superposition Stefan Woltering and Karl-Friedrich Daemrich.....	169
Modelling Surface Water Waves - An Application of High-Level GLN Theory C. T. Chan and C. Svvan.....	182
Numerical Simulation of the Second Order Nonlinear Effects on Wave Spectra and Statistical Properties of Coastal Waves Hajime Kato, Hisamichi Nobuoka and Yasumitsu Komatsuzaki.....	195
Shallow-Water Spectral Shapes Jane McKee Smith	206
Wave Deformation in Vegetation Fringed Channels Toshiyuki Asano, Ryoko Matsumoto and Seiji Kikuchi	218
Interaction and Deformation of Solitary Waves around Channel Junction Masatoshi Yuhi, Hajime Mase and Hajime Ishida	230
Wave Field Modifications by Elliptic Bathymetric with Gradual Transitions in Depth Christopher J. Bender and Robert G. Dean	243
Numerical Modeling of Ship-Induced Currents in Confmed Waterways Okey G. Nwogu and Zeki Demirbilek	256
Analytical Model for Wave Transformation at Artificial Reefs Matthias Bleck and Hocine Oumeraci	269
Transformation of Irregular Waves and Wave Groups due to Breaking and Nonlinear Processes Iana Saprykina and Sergey Kuznetsov.....	282
Spectral Evolution of Breaking - Non Breaking Waves in the Surf Zone Panayotis Prinos, Evangelos Koutandos and Theophanis Karambas	295
Velocity Measurements Under Broken Waves and Bores Sandra Longo and Marco Petti	305
Roller Modelling in the Context of Undertow Prediction R. Cienfuegos, E. Barthelemy and P. Bonneton	318
Refined Surface Tension Model for Lagrangian Simulation of Wave Breaking Hiroyuki Ikari, Hitoshi Gotoh, Mami Hashimoto and Tetsuo Sakai	331

Three-Dimensional Large Eddy Simulation of Vortices Induced by Plunging Breaking Waves Pierre Lubin, Stephane Vincent, Jean-Paul Caltagirone and Stephane Abadie	344
Experimental Verification of the Relative Trough Froude Number (RTFN) Method for Wave Breaking in Boussinesq Models Takashi Okamoto and David R. Basco	357
Extra Strain Rates in Spilling Breaking Waves S. K. Misra, J. T. Kirby, M. Brocchini, M. Thomas, F. Veron and C. Kambhamettu	370
Estimates of Surf Zone Turbulence in a Large-Scale Laboratory Flume Christopher P. Scott, Daniel T. Cox, Sungwon Shin and Neil Clayton	379
Wave Celerity in the Inner Surf Zone P. Bonneton.....	392
Boussinesq Modelling of Breaking Waves: Description of Turbulence R. Briganti, G. Bellotti, R. Musumeci, E. Foti and M. Brocchini	402
SPH Modeling of Breaking Waves Benedict D. Rogers and Robert A. Dalrymple	415
Laboratory Observation of Breaking Criteria of Wind-Generated Deepwater Waves Sang-Ho Oh, Natsuki Mizutani, Noriaki Hashimoto and Kyung-Duck Suh	428
Time-Variant Mass Transport Beneath Breaking Waves Jens Harms and Torsten Schlurmann	441
Surf Zone Wave Modeling: Improvement of Dissipation by Depth-Induced Breaking in SWAN and Application in Malacca Straits Sin Hwei Lydia Lim and Eng Soon Chan.....	454
Dissipation of Nonlinear Shallow Water Waves K. L. Edwards, J. M. Kaihatu, J. Veeramony.....	467
Mesoscale Wave Energy Dissipation Over Heterogeneous Sediments Paul A. Work, Hüseyin Demir, James M. Kaihatu and George Voulgaris.....	477
Wave-Induced Sediment Resuspension on a Muddy Inner Shelf During Hurricane Claudette A. Sheremet, G. W. Stone and X. Zhang	490

Dissipation of Wave Energy by Cohesive Sediments J. M. Kaihatu and A. Sheremet	498
Wave and Current Interactions with Vegetation Takao Ota, Nobuhisa Kobayashi and James T. Kirby.....	508
Experimental and Numerical Study of Irregular Wave Boundary Layers on a Rough Bottom Ahmad Sana, Hitoshi Tanaka and Takeshi Suzuki	521
Application of a Mild-Slope Equation FEM Model with Internal Generation of Waves: The Venice Lido Inlet Case Gian-Mario Beltrami.....	529
The Role of Wind Waves on the Formation and Development of Langmuir Circulations in a Shallow Water Region Nobuhiro Matsunaga and Ken-ichi Uzaki.....	542
Diffusion of Turbulent Jet under Waves Kuang-An Chang, Yonguk Ryu and Nobuhito Mori	555
Breaking Wave Loads on a Slender Pile in Shallow Water Kai Irschik, Uwe Sparboom and Hocine Oumeraci	568
Modeling of Wave Interaction with Complex Coastal Structures Using an Enhanced VOF Model Fengyan Shi, Qun Zhao, James T. Kirby, Dal Soo Lee and SeungNam Seo	581
Estimating Incident and Reflected Waves Using a Fully Nonlinear Wave Model Miguel Figueres and Josep R. Medina.....	594
Boussinesq Modeling of Wave Interaction with Porous Submerged Breakwaters Ioannis Avgeris, Theophanis V. Karambas and Panayotis Prinos.....	604
Reflection of an Obliquely Incident Bore from an Inclined Wall Hideo Matsutomi and Kentaro Imai	617
Effects of Cross Angle Between Wave and Current on Three-Dimensional Flow Fields Around a Cylinder Shinya Umeda, Toshiharu Magai, Masatoshi Yuhi and Hajime Ishida	629
Estimation of Mach-Stem Breaker Height Along Structures Tetsu Memita and Tetsuo Sakai	642

The Influence of Swell on the Sea Surface Roughness and the Growth of Wind Waves Qin Chen, Paul A. Hwang and James M. Kaihatu	654
Growth Response of Waves to the Wind Stress William L. Peirson and Stephen E. Belcher	667
Laboratory Real Storni Reproduction Using Wind Jose A. González-Escrivá, Joaquin M. Garrido, Josep R. Medina and Jimmy Geeraerts	677
Development and Verification of the Coupled Atmosphere-Ocean Model for Ise Bay, Japan Teruo Ohsawa, Hideaki Mizutani, Tomokazu Murakami, Tomonao Kobayashi, Takashi Yasuda and Tateki Fujiwara	690
Long-term and Extreme Wave Climate of the Black Sea Erdal Ozhan, Saleh Abdalla and Nihal Yilmaz	701
A Nearshore Wave Atlas Along the Coasts of France Based on the Numerical Modeling of Wave Climate over 25 Years Michel Benoit and Florence Lafon	714
Extreme Events and Wave Forecast in the Iberian Nearshore Eugen Rusu, Carlos Ventura Soares, Jose Paulo Pinto and Raquel Silva	727
A Hind-Cast Data Base for the Design of Offshore Wind Energy Structures in the German Bight Kim Mittendorf, Martin Kohlmeier and Werner Zielke	740
Extreme Hydrodynamic Boundary Conditions in Ostend (Belgium) Koen Trouw, Joris Blanckaert, Toon Verwaest, David Hurdle, Wim Van Alboom, Jaak Monbaliu, Julien De Rouck, Peter De Wolf, Marc Willems, Marc Sas, Daniel Decroo, and Gijs Van Banning	753
A Wave Forecasting System for the Real Time Management of the Gijon Harbour Jose Moyano Retamero, Elena Sánchez-Badorrey and Marta Gómez Lahoz	766
Multi-Decadal Wind Wave Modelling Over the Baltic Sea Witold Cieslikiewicz, Barbara Paplinska-Swepel and Carlos Guedes Soares	778
Forecasting Wave Conditions in Beaches. From Nested Simulations to Field Observations Daniel González-Marco, Agustin Sánchez-Arcilla, Rodolfo Bolanos, Joaquim Sospedra, Joan Pau Sierra and Javier Uzcanga	791

Effects of Boundary Condition Evaluation on Design Wave Modeling Hanz D. Niemeyer, Ralf Kaiser and Agnieszka Herman	804
Limits of Operational Wave Prediction in the North-Western Mediterranean Rodolfo Bolafios, Agustin Sánchez-Arcilla, Jesus Gómez and Jordi Cateura	818
Modelling of Hydrodynamics Around a Scheme of Detached Leaky Breakwaters Premanandan, T. Fernando and Shunqi Pan.....	830
Linear Wave Propagation on an Adaptive Quad-Tree Cut-Cell Grid Rodolfo Silva, Alistair G. L. Borthwick and Edgar G. Mendoza.....	842
Improvement of the Numerics and Deep-Water Physics in an Academic Version of SWAN Andre J. van der Westhuysen, Marcel Zijlema and Jurjen A. Battjes	855
Near-Shore Wave Modeling with Two Coupled Models: SWAN and Triton J. Groeneweg, N. Doorn, M. J. A. Borsboom and A. R. van Dongeren.....	868
Energy Balance Equation Model with Diffraction Effect for Random Waves Kazuya Oki, Hajime Mase and Terry S. Hedges	881
A Third-Generation Spectral Wave Model Using an Unstructured Finite Volume Technique Ole R. Sorensen, Henrik Kofoed-Hansen, Morten Rugbjerg and Lars S. Sorensen.....	894
Reliability of SWAN at the Petten Sea Defence Gerbrant Van Vledder, Jacco Groeneweg and Sjaak Jacobse	907
On the Accuracy of Wave Models in the Coastal Zone Sonia Ponce de Leon, Paula Pilar and Carlos Guedes-Soares.....	920
Wave Modelling in Intertidal Estuaries: Comparison with Measured Data Nigel P. Tozer, Stephen M. Grey and Toni J. Ellam.....	933
Modeling of Typhoon Wind-Waves Around the Yangtze Estuary, China Kelin Hu, Pingxing Ding and Qin Chen	946
Estimating the Parent Distribution of Storm Type-Separated Annual Maximum Wave Heights on the Northwestern Pacific Ocean Masataka Yamaguchi, Hirokazu Nonaka and Yoshio Hatada.....	959

Wave Data Analysis by Hubert Huang Transform and Conventional Discretization Methods Albena D. Veltcheva and Carlos Gliedes Soares	972
Interpolation of Time Series of Sea State Variables Using Neural Networks Josep R. Medina and Obdulio Serrano-Hidalgo	985
Temporal and Spatial Statistical Variability of the Wave Height in the Surf Zone M. C. Castillo, A. Baquerizo and M. A. Losada	997
Short Range Wave Forecasts Using Ensemble Wave Prediction System Nobuhito Mori and Hiromaru Hirakuchi	1009
Depth-Limited Distribution of the Highest Wave in a Sea State Fernando J. Mendez, Inigo J. Losada and Raul Medina	1022
Joint Probability Distributions for Wave Height, Wind Setup and Wind Speed P. H. A. J. M. van Gelder, J.K. Vrijling and D. H. van Haaren	1032
Phase Inversion and the Identification of Harmonic Structure in Coastal Engineering Experiments Alison C. Hunt, Paul H. Taylor, Alistair G. L. Borthwick, Peter K. Stansby and TongFeng	1047
Development of Simultaneous Plane Measurement Techniques of Air and Water Flows Close to Wind Wave Interfaces K. Takehara, N. Ohtsuka, T. G. Etoh, Y. Takano, G. Tsujimoto and N. Mizutani	1060
Optical Remote Sensing Estimates of the Incident Wave Angle Field During NCEX Rob Holman and Chris Chickadel	1072
Imaging Measurement of Whitecaps at Sea Observation Tower Yuji Sugihara, Hiromichi Tsumori, Hiroshi Yoshioka, Shigeatsu Serizawa and Akira Masuda	1082
GPS Buoy Application to Offshore Wave, Tsunami and Tide Observation Toshihiko Nagai, Hideaki Ogawa, Yukihiro Terada, Teruyuki Kato and Masanobu Kudaka	1093
Observation of Ocean Waves by Long-Range Ocean Radar Shoichiro Kojima, Kenji Satoh and Takeshi Matsuoka	1106

Long Waves, Nearshore Currents, and Swash	1119 ↑
Lagrangian Multiphase Flow Model for Debris-Flow-Induced Tsunami Hitoshi Gotoh, Minoru Hayashi and Tetsuo Sakai.....	1121
Earthquake Induced Wave Motions in Closed Water Bodies Muthukumar Narayanaswamy and Robert Dalrymple.....	1134
SPH Modelling of Underwater Landslide Generated Waves A. Panizzo and R. A. Dalrymple	1147
Mechanism of Seawater Exchange in Semi-Enclosed Bay with Sill and Its Modeling Itabashi Naoki, Tadashi Hibino and Hiroichi Tsuruya.....	1160
Promoting Ebb Dominance in Coastal Lagoons A. B. Fortunato and A. Oliveira.....	1173
High Resolution Modelling of Texel Inlet E. P. L. Elias, J. Cleveringa and M. J. F. Stive	1186
Comparison of Numerical Tidal Models for Practical Applications Andreas Dieter Plüß and Holger Schüttrumpf	1199
Energy Transfer and Dissipation During Surf Beat Conditions T. E. Baidock and T. J. O'Hare.....	1212
Shoaling and Shoreline Dissipation of Subharmonic Gravity Waves Ap Van Dongeren, Job Van Noorloos, Kate Steenhauer, Jurjen Battjes, Tim Janssen and Ad Reniers	1225
Analysis and Prediction of Seiches in Rotterdam Harbour Basins Martijn P. C. de Jong and Jurjen A. Battjes	1238
Characteristics of Infragraviry Waves around Japan in Relation to Wind Waves M. Shiga, K. Nakai, T. Sakai, K. Nadaoka and C. Yamamoto	1251
Field Observations and Numerical Simulations of Harbor Oscillations due to Long Period Waves Ken-ichi Uzaki, Nobuhiro Matsunaga, Yasuhiro Nishii and Kazuhito Takase	1264

Boussinesq Modelling of Wavegroup Propagation over a Shallow Shoal and the Release of Second Order and Higher Harmonics Benjamin P. Weston, Paul H. Taylor, Alistair Borthwick, Alison C. Hunt and Peter K. Stansby	1277
Observation and Computation of Resonant Long Period Oscillation Excited by Strang Wind Hiroshi Yoshioka, Tomotsuka Takayama and Shigeatsu Serizawa	1290
Long Period Waves and Wave Envelope in Shallow Water During a Storm Takehito Horie, Katsumi Seki and Masaru Mizuguchi	1299
Experimental Analysis of Long Waves at Harbour Entrances Javier L. Lara, Francisco L. Martin, Inigo J. Losada and Gabriel Diaz	1308
Harbour Short Wave Agitation and Resonance Based on Modified Boussinesq Equations Inigo J. Losada, Philip L.-F Liu, Mauricio Gonzalez, Gabriel Diaz, Jose M. Gonzalez and Seung B. Woo	1321
Comparing the Effects of Different Three-Dimensional Forcing on Nearshore Currents Kristen D. Splinter and Donald N. Slinn	1334
Photogrammetric Survey of the Surf Zone for Calibration and Validation of Numerical Models Stefan Schimmels, Werner Zielke, Folke Santel and Christian Heipke	1343
Long-term Monitoring and Analysis of Optically Measured Longshore Currents Chris Chickadel and Rob Holman	1356
Field Verification of a Numerical Q-3D Nearshore Current Model Kuchiishi Takayuki, Kenichi Kato, Masamitsu Kuroiwa, Yuhei Matsubara and Hideaki Noda	1367
Nearshore Macrovortices Generated at a Submerged Breakwater: Experimental Investigation and Statistical Modelling L. Soldini, C. Lorenzoni, A. Piattella, A. Mancinelli and M. Brocchini	1380
A Laboratory Investigation of Nearshore Turbulence Mark S. Osler, Ib A. Svendsen and James T. Kirby	1393
Resistance to Longshore Current Over a Rippled Bed Bradley D. Johnson	1404

Modeling of the Wave and Circulation Field at the Nearshore Canyon Experiment (NCEX) Joseph W. Long and H. Tuba Özkan-Haller	1417
Three-Dimensional Nearshore Currents Model Using Sigma Coordinate System Hisamichi Nobuoka, Nobuo Mimura and J. A. Roelvink	1429
Experimental Investigation on Waves and Currents Crossing at a Right Angle L. Cavallaro, R. E. Musumeci, E. Foti and P. Blondeaux	1442
Evaluation of the Longshore Current for a Sector of the Portuguese West Coast: Application of Different Methodologies Raquel Silva, A. Jorge da Silva, Eugen Rusu, Filipa S. B. F.Oliveira, Sergio H. C. D. Larangeiro and Rui Taborda	1455
Video-Derived Observations of Alongshore Currents Anna B. Cohen, Stefan G. J. Aarninkhof and C. Chris Chickadel	1468
Laboratory Measurements of Time-Varying Rip Currents Kevin A. Haas, Brian K. Sapp and Andrew B. Kennedy	1480
Pulsing and Circulation in Rip Current System D. P. Callaghan, T. E. Baidock, P. Nielsen, D. M. Hanes, K. Haas and J.H. MacMahan	1493
On The Configuration of Rip Channel Accelerating Development of Rip Current Makoto Shibasaki, Takaaki Uda, Masumi Serizawa, Takayuki Kumada and Akio Kobayashi	1506
Rip Current Measured at Uradome Beach, Tottori, Japan Ichiro Deguchi and Susumu Araki	1519
Effect of Wave Forcing on Storm Surge R. J. Weaver and Donald N. Slinn	1532
Multi-Level Storm Surge Model Incorporating Density Stratification and Wave Setup Hidenori Shibaki, Keiji Nakai, Katsuyuki Suzuyama and Akira Watanabe	1539
Development of Storm Surge and Tsunami Simulator in Oceans and Coastal Areas Taro Kakinuma and Takashi Tomita.....	1552

Regional-Scale Storm-Surge Modeling of Long Island, New York, USA Jennifer L. Irish, Brian P. Williams, Adele Militello and David J. Mark.....	1565
Wind-Wave-Surge Parallel Computation Model and Its Application to Storm Surge Simulation in Shallow Sea Kyeongok Kim and Takao Yamashita	1578
Copula Approach for Flood probability Analysis of the Huangpu River during Barrier Closure J.Y. Nai, P. H. A. J. M. van Gelder, P. J. M. Kerssens, Z.B. Wang and E. van Beek	1591
Swash from Long Waves J. W. Kamphuis.....	1604
Swash boundary and cross-shore Variation of horizontal velocity on a slope Ashwini Kumar Otta and Adrian Pedrosa Acuna	1616
Numerical Investigation of Swash Zone Shear Stresses Jack A. Puleo and Donald N. Slinn.....	1629
Numerical Simulation of Storm-Induced Current System in Coastal Region Shigeru Kato and Takao Yamashita	1638
Effect of the Kuroshio Meandering on Sea Levels along the Pacific Coast Katsuaki Komai, Shiro Kawashima and Tadashi Hibino.....	1650
Sediment Transport and Morphology	1663
Sediment Transport of Non-Uniform Sands in Oscillatory Sheet-Flows Wael Hassan and Jan Ribberink	1665
Numerical Modelling of Littoral Sand Transport Catherine Villaret and Alan G. Davies	1678
Numerical and Experimental Study of Wave-Generated Sheet Flow Tom O'Donoghue, Ming Li, Jonathan Malarkey, Shunqi Pan, Alan G. Davies, and Brian A. O'Connor	1690
A Sheet-Flow Transport Rate Formula for Asymmetrie, Forward-Leaning Waves and Currents Akira Watanabe and Shinji Sato	1703
An Evaluation Method of Suspended Sediment Concentration In and Outside the Surf Zone Mantripathi Prabath Ravindra Jayaratne and Tomoya Shibayama	1715

Numerical Simulation of Sediment Suspension Above Rippled Bed Under Broken Waves Ming Li, Shunqi Pan and Brian A. O'Connor	1728
Wave-Induced Sediment Transport Processes in the Ripple Regime Jebbe J. van der Werf and Jan S. Ribberink	1741
Suspended Sand Concentrations in Surf Zones Yukiko Tega, Nobuhisa Kobayashi, Michael A. Giovannozzi and Bradley D. Johnson	1754
Sediment Suspension Under Sheet Flow Conditions: Regular and Random Waves Plus Current Lars Erik Holmedal and Dag Myrhaug	1767
Modelling Suspended Sediment Profiles Under Waves: A Finite-Mixing-Length Theory Ian A. L. Teakle and Peter Nielsen	1780
Numerical Simulation of 3-D Intermittent Sediment Suspension in the Surf Zone Takayuki Suzuki and Akio Okayasu	1793
Large Scale Bedforms and Sediment Transport in Front of Cliffs Elena Sánchez-Badorrey and Miguel A. Losada	1805
Analysis of Cohesive Sediment Transport in Decelerating and Accelerating Flow Luis Ivens Portela and Miguel Maldonado Reis	1818
Flume Measurements of Regular Wave Group-Induced Pore Pressures in a Fluidized Sandy Bed Shiaw-Yih Tzang and Shan-Huei Ou	1830
The Influence of Offshore Storm Waves on Groundwater Dynamics and Salinity in a Sandy Beach Nick Cartwright, Peter Nielsen and Ling Li	1841
Wave Attenuation and Mud Mass Transport Under Irregular Waves Mohsen Soltanpour, Tomoya Shibayama, Yugo Masuya and Iman Sabzevari ...	1851
Risk Analysis of Unsaturated, Non-Cohesive Subsoil due to Turbulent Flow Fluctuations M. Davis, M. A. Koenders and H. J. Köhler	1861

Modeling Cross-Shore Sediment Transport Processes with a Time Domain Boussinesq Model Wen Long, Tian-Jian Hsu and James T. Kirby	1874
Acoustic Characterisation of Shingle Movement in the Surf Zone Travis Mason, Duncan Priestley, Belen Blanco, Andrew Bradbury, Dominic Reeve, Maurice McCabe, Tom Coates and Nick Smith	1887
The Offshore Breakwater Scheine at Sea Palling, England: Sand Transport Generated by Tidal Currents J. C. Bacon, C. E. Vincent, T. Dolphin, J. Taylor, Shunqi-Pan and B. O'Connor	1896
A New Look at the Applicability of Classical Models for Ripple Prediction M. R. Delgado Blanco, P. Bell and J. Monbaliu	1909
Modelling of Sediment Transport in a Tide-Dominated Coast. Case Study: Central Dithmarschen Bight, German Wadden Sea Poerbandono and R. Mayerle	1922
Modelling Sediment Transport Processes in the NW Portuguese Shelf Sergio H. C. D. Larangeiro, Anabela Oliveira, João Vitorino and Rui Taborda....	1935
Sediment Suspension Modeling by Smoothed Particle Hydrodynamics Shan Zou and Robert A. Dalrymple	1948
Prediction of Sediment Transport in the Swash Zone by Using a Nonlinear Wave Model Th. V. Karambas	1959
Evaluation of a Novel Multi-Functional Artificial Reef for Dubai Gary Mocke, Francois Smit and Khalid Al Zahed	1971
Processes Governing Shoreline Response to Submerged Breakwaters: Multi-Function Structures - a Special Case Roshanka Ranasinghe and Ian L. Turner	1984
Downdrift Transfer of Background Erosional Pressure by a Littoral Barrier Robert G. Dean	1997
A Simple New Shoreline Evolution Model Jon K. Miller and Robert G. Dean	2009
Geomorphic Approach for Mitigating Beach Erosion Downdrift of Littoral Barrier John R-C. Hsu, Antonio H. F. Klein and Lindino Benedet.....	2022

Extending a 1-Line Modeling Approach to Explore Emergent Coastline Behaviors A. Brad Murray and Andrew Ashton.....	2035
Development of Practical One-Line Model Applicable to Coasts with Scarce Wave and Topographic Data Masahiro Miura, Takaaki Uda, Masumi Serizawa, Takayuki Kumada and Akio Kobayashi	2048
Predictive Model of Formation of a Sand Spit Shusuke Watanabe, Masumi Serizawa and Takaaki Uda	2061
Rapid Formation of a Barrier Island and Beach Erosion Caused by Large-Scale Excavation of Reef Flat on Carbonate Beach Yutaka Osuga, Takaaki Uda, Susumu Onaka, Shubun Endo, Masumi Serizawa and Toshiro San-Nami	2074
Uncertainty Assessment of Long Term Shoreline Prediction A. Payo, A. Baquerizo and M. A. Losada	2087
Matane (Quebec) Dyke Modification and Subsequent Beach Erosion Yann Ropars	2097
Calibration of a Process Model for Barrier Island Breaching David R. Basco	2108
Numerical Morphological Model of Barrier Island Breaching Nicholas C. Kraus and Kentaro Hayashi.....	2120
Modeling Dune Response by Overwash Transport Magnus Larson, Randall A. Wise and Nicholas C. Kraus.....	2133
Modeling of Storm Induced Barrier Island Overwash and Breaching in the Atlantic Coast of Long Island, New York Rafael Canizares, Santiago Alfageme and Mark B. Gravens.....	2146
Stochastic Processes in Beach Response Predictions S. M. van Leeuwen, N. Dodd, D. Calvete and A. Falques	2159
A Conceptual Model for the Retreat and Volume Loss of the Louisiana Barrier Islands with Implications for the Design of Beach Nourishment Thomas Campbell and Lindino Benedet.....	2170
Practical Insights and Applicability of Empirical Bay Shape Equations Lindino Benedet, Antonio H. F. Klein and John R-C. Hsu.....	2181

Medium-Term Q-3D Coastal Area Model with Shoreline Change around
Coastal Structures
Masamitsu Kuroiwa, J. William Kamphuis, Takayuki Kuchiishi,
Yuhei Matsubara and Hideaki Noda.....2194

Numerical Simulation of Beach Changes Using an N-Line model
Van To Dang and Ronald J. Cox 2207

Numerical Modeling of Dynamic Equilibrium Bay Shape
Sutat Weesakul, Tanuspong Pokavanich and Thet Yee Win 2220

Application of a Predictive Channel Shoaling and Migration Model, M3D, to
St Marys Entrance, Florida
Christopher W. Reed, Himangsu Das and Alan W. Niedoroda 2232

VOLUME THREE [↑](#)

Seasonal Mudflat Profile Evolution
Fumihiko Yamada, Nobuhisa Kobayashi, Makoto Nakamichi and
Tetsuya Kakinoki 2243

Modeling of Medium Scale Morphodynamics of a Tidal Flat Area in
the German Wadden Sea
Jort Wilkens and Roberto Mayerle 2256

Prediction Model of Storm-Induced Erosion and Deposition in the
Yangtze Estuary
Pingxing Ding, Kelin Hu and Yazhen Kong 2269

Morphodynamics of the Tagus Estuary Entrance. Simulation of
Alternative Solutions for Bar Maintenance
Mario Teles and Andreia Barata 2280

Hydromorphological Model of the Surrounding Water of Macao
Andreia Barata, Mario Teles and J. Seabra de Melo 2290

A Method Based on Electrical Conductivity Measurement to Monitor
Local Depth Changes in the Surf Zone and in Depth Soil Response to
the Wave Action
Mathieu Cassen, Stephane Abadie, Gael Arnaud and Denis Morichon 2302

Cross-Shore Evolution of Buarcos Beach, Portugal
Paula Freire, Filipa S. B. F. Oliveira, Rui Capitão, Conceição Fortes and
Mariana Costa 2314

Longshore Variation of Depth of Closure on a Micro-Tidal Wave-Dominated Coast Francois Sabatier, Marcel J. F. Stive and Frederic Pons	2327
Hyperbolic Model for Equilibrium Beach Profiles with Shoaling and Breaking Zones Eduardo Garcia and Raul Medina.....	2340
Profile Change of Coarse and Fine Material Composite Beach Takao Yamashita, Jungwook Park and Matahiro Ito	2353
Study on Velocity Field on Beach and Profile Change of Beach Consisting of Sand and Gravel Mixture Norimi Mizutani, Hyun-Ho Ma and Shu Eguchi	2364
The Variation Under Different Conditions of the Influence of In-Exfiltration on Swash Zone Sediment Transport Tony Butt, Paul Russell, Ian Turner, Jon Miles and Gerhard Masselink.....	2377
Sediment-Level Oscillations in the Swash Zone of a Mixed Sand and Gravel Beach Diane P. Höm and Susan M. Walton	2390
Investigations on Recent Accelerated Beach Erosion on Ajigaura Coast, Ibaraki, Japan Hiromune Yokoki, Nobuo Mimura, Yosuke Minami and Hisamichi Nobuoka	2403
Development of an Equilibrium Bay: A Long-Term Morphodynamic Modeling Study Markus Witting and Ulrich Zanke	2413
Enhancement of T-Groin's Design to Improve Downdrift Shoreline Response Mohamed A. Dabees, Brett D. Moore and Kenneth K. Humiston	2423
Simulation of Coastal Evolution Using an N-Line Model Including Wind-Induced Currents Yasuyuki Baba, Magnus Larson, Hans Hanson and Takao Yamashita.....	2436
One-Line Modelling of Complex Beach Conditions: An Application to Coastal Erosion at Hai Hau Beach in the Red River Delta, Vietnam Chantal Donnelly, Nguyen Manh Hung, Magnus Larson and Hans Hanson	2449
Predicting Shoreline Change on a Manipulated Shoreline Margery F. Overton, John S. Fisher and Robert Dolan	2462

Short-term Prediction of Coastal Recession Around Sandwip Island in the Northern Bay of Bengal, Bangladesh Mustafa Ataus Samad and Hitoshi Tanaka.....	2471
Linear Evolution of Sand Wave Packets and Relevance to Offshore Sand Extraction Pieter C. Roos, Paolo Blondeaux, Suzanne J.M.H. Hulscher and Giovanna Vittori	2484
Understanding and Predicting Morphological Change in the Inner Humber Estuary Ivan Haigh, Paul Norton and Ian Townend.....	2493
Morphodynamic Modeling of the Öbidos Lagoon Anabela Oliveira, Andre B. Fortunato and Francisco E. P. Sancho	2506
Physical Processes Associated with Onshore Sand Bank Migration Adjacent an Estuary Mouth Nigel P. Aird, Mark A. Davidson and Ismael J. Marino-Tapia	2519
Dimensionless Parameters to Describe Topographical Equilibrium of Coastal Inlets Totok Suprijo and Akira Mano	2531
Migration of Channels Immediately Landward of Tidal Inlets Billy L. Edge and Wahyu W. Pandoe	2544
Sand Waves of the Navigation Channel of the Ponta da Madeira Harbour (Brazil) Rodrigo Nogueira de Araújo, Paolo Alfredini and Rogerio Fernando do Amaral.....	2558
Infragravity Waves and Rhythmic Shoreline Forms at a Non-tidal, Sandy Coast with Multiple Bars Zbigniew Pruszk, Grzegorz Różynski, Marek Szmytkiewicz and Rafat Rafal Ostrowski	2568
Morphological Development of Shallow Sand Pits Paolo Blondeaux and Giovanna Vittori	2581
Superimposed Processes Creating a Complex Erosional Area at the South Atlantic Coast of Spain Christian M. Appendini, Jose Maria Medina Villaverde, Rafael Gonzalez y Diez de la Cortina and Enrique Perez Gomez.....	2594

A Numerical Hybrid Model for the Morphology of a Barred Coast with a River Mouth Hans Fabricius Hansen, Rolf Deigaard and Nils Dranen	2607
Implications of Morphodynamic Time Scale for Coastal Protection Hans Hanson and Magnus Larson	2620
A Hybrid Approach for Modelling the Impact of Submerged Offshore Breakwaters on Egypt's North-West Coast Hans de Vroeg, Robin Morelissen, Abdel-Azim M. Ali and HanaaRasmy Fahmy	2633
Coastal Area Morphological Modelling in the Vicinity of Groins Hakeem Johnson	2646
2DH and Multi 1DH Morphological Model for Medium Term Evolution of Large Scale Features and Nourishment in the Nearshore Region: Application to Trucvert and Corniche Beach (France) and La Barrosa Beach (Spain) Philippe Larroude and Benoit Camenen	2659
Field Investigation on Regional Sediment Movement around the Shounan Coast Shinji Sato, Takako Fukuyama, Takehisa Matsuda and Susumu Tanaka	2668
Use of X-Band Radar for Wave and Beach Morphology Analysis Jae Hyeng Lee, Satoshi Takewaka, Takayuki Sakai and Seiki Takano.....	2681
Mass Transport and Related Bedforms Induced by Phase-Locked Edgewaves in a Groin Asunci3n Baquerizo, Miguel Ortega-S3nchez and Miguel A. Losada.....	2694
Validation of a New Transport Formula (TRANSPOR2004) in a Three-Dimensional Morphological Model D. J. R. Walstra, L. C. van Rijn and A. Klein	2703
Influence of Sediment Transport Formulation on the Linear Stability of Planar and Barred Coasts M. D. Klein, H. M. Schuttelaars and M. J. F. Stive	2716
Modeling Bar Migration Using Predicted Velocity Time Series Jamie Lescinski and H. Tuba 3zkan-Haller	2729
Statistical Simulations for Coastal Bluff Failure Induced by Storm Waves Chia-Chi Lu, Wenkai Qin and Bruce M. Williams	2742

Sand Bar Dynamics from a Parametric Morphodynamic Model I. Marino-Tapia, T. J. O'Hare, P. E. Russell, M. A. Davidson and D. A. Huntley	2755
Video Observations of Crescentic Sandbar Formation and Modelling Implications Giovanni Coco, B. G. Ruessink, I. M. J. Van Enckervort, M. Caballeria, A. Falques, R. A. Holman, N. G. Plant and I. L. Turner	2767
Generation of Nearshore Morphology in a Combined Wave-Current- Morphology System Hai-Ying Jiao and H. Tuba Özkan-Haller	2777
Hydrodynamics and Morphodynamics at a Protected Beach: The Case Study of Pellestrina, Italy Barbara Zanuttigh, Renata Archetti and Carlo Barbanti	2784
Non-Linear Behaviour of a Double Nearshore Bar System Marije W. J. Smit, Ad J. H. M. Reniers, Marcel J. F. Stive and Dano J. A. Roelvink.....	2797
Experimental Analysis and 2DH Numerical Simulations of Morphodynamics Around Low-Crested Structures Luca Martinelli, Barbara Zanuttigh, Emanuela Clementi, Massimo Guerrero and Alberto Lamberti	2810
Morphological Modelling Under an Event-Driven Wave Climate Gerhardus P. J. Diedericks, Geoffrey G. Smith and Stephen Luger.....	2823
Morphodynamics on a Beach with a Submerged Detached Breakwater Agustin Sánchez-Arcilla, Jose M. Aisina, Ivan Cáceres, Daniel González-Marco, Joan P. Sierra and Carlos Pefia	2836
Storm-Scale Effects of Shore-Parallel Breakwaters on Beaches in a Tidal Setting (LEACOAST) Tony Dolphin, Jon Taylor, Chris Vincent, John Bacon, Shunqi Pan and Brian O'Connor.....	2849
Advanced Morphological Models for Engineering Applications Stefan G. J. Aarninkhof, Gijsbert van Holland, J. A. (Dano) Roelvink and RobC. Steijn.....	2862
Morphodynamic Instabilities in the Surf Zone Sandra Fachin and Francisco E. P. Sancho	2875

Generation of Nearshore Oblique Sand Bars: Sensitivity to Sand Transport Formulation F. Ribas, N. C. Vis-Star, H. E. de Swart and A. Falques	2888
Design of Carbonate Sand Beaches in Barbados Robert B. Nairn, Mohammad Dibajnia, David Anglin and Michael J. Risk	2901
On Wind-Blown Transport Rate of Fine Sand Shintaro Hotta, Susumu Kubota and Souichi Harikai	2914
Experimental Study on Effect of Vegetation Vibration on Blown Sand Keiko Udo, Satoshi Takewaka and Hitoshi Nishimura	2927
Coastal Management, Dredging, and Beach Nourishment	2941 ↑
Coast Protection at Sidmouth John Andrews	2943
Completing the CaHKT-TleTep6ypr Flood Protection Barrier — Technical Feasibility Study Frank Wiersma, Te Slaa Bert, Alex Boutovski, Sergei N. Kuraev, Alexander A. Garkavko and TatianaN. Kuznetsova	2954
Better Coastal Management by Including Offshore and Geological Information in the Sediment Budget Per Sorensen, Christian Lastrup, Soren Bjerre Knudsen and Holger Toxvig Madsen	2960
Large-Scale Sand Balance of the Netherlands Coastal System; Modelling of a Policy Indicator Henk J. Steetzel, Zheng B. Wang and Jan P. M. Mulder	2973
Balancing Research Efforts and Management Needs. A Challenge for Coastal Engineering Mark van Koningsveld, Marcel J. F. Stive and Jan P. M. Mulder	2985
The "Prestige" Oil Spill: An Emergency Response Plan for the Cantabrian Coast Sonia Castanedo, Raul Medina, Inigo J. Losada and Fernando J. Mendez	2998
Coastal Hazard Prevention and Response Evaluation Lesley C. Ewing, Costas E. Synolakis and Donald D. Treadwell	3011

Economic Impacts of Anthropogenic Activities on Coastlines of the United States Orville T. Magoon, S. Jeffress Williams, Linda K. Lent, James A. Richmond, Donald D. Treadwell, Scott L. Douglass, Billy L. Edge, Lesley C. Ewing and Anthony P. Pratt.....	3022
Coastal Flood Forecasting: Best Practice in England and Wales Peter Hawkes, Rahman Khatibi and Paul Sayers.....	3036
A Comparison of Flood Risk Assessment Practices in the Netherlands and Japan S. N. Jonkman, F. Kato and J. K. Vrijling.....	3049
Efficient Broad Scale Coastal Flood Risk Assessment Richard Dawson, Paul Sayers, Jim Hall, Mohammed Hassan and Paul Bates.....	3061
Performance Design Concept for Storm Surge Defenses Shigeo Takahashi, Hiroyasu Kawai, Tomotsuka Takayama and Takashi Tomita.....	3074
Factors Controlling Vulnerability to Storm Impacts along the Catalanian Coast E. Tonatiuh Mendoza and Jose A. Jimenez.....	3087
Coastal Data Collection in Support of Regional Sediment Management Richard J. Seymour.....	3100
Regional Sediment Management Based on Sediment Budget For Graded Sediments — A Case Study of Tenryu Watershed and the Enshu-Nada Coast Ken-Ichi Torii, Shinji Sato, Takaaki Uda and Tetsuya Okayasu	3110
Flood Risk Analysis for the Flemish-Dutch Coast Toon Verwaest, Koen Trouw, Chantal Martens, Björn Van de Walle, Kim Suykens, Rik Houthuys, Jan Maertens, Chris Keppers, Peter Wauters, Eis Stoops, Steven Smets, Wouter Vanneuville, Koen Maeghe and Tom De Mulder	3123
Video Monitoring in Support of Coastal Management Kathelijne M. Wijnberg, Stefan G. J. Aarninkhof, Mark van Koningsveld, B. Gerben Ruessink and Marcel J. F. Stive.....	3136
Basin-Wide Approaches to Numerical Modeling for Wetland Restoration Projects Jeffrey G. Shelden, Paul A. Tschirky and Ramona T. Holdstock	3149

Assessing Coastal Hazards Using Recent 3D Evolution of Beach Geomorphology Based on LIDAR and RTK-GPS Surveys Helena Mitasova, Margery F. Overton, Russell S. Harmon and David Berstein	3162
Sediment Dynamics Associated with Managed Realignment; Freiston Shore, The Wash, U.K. Andrew M. Symonds and Michael B. Collins	3173
Managing Coastal Erosion in Europe Illustrated by 60 Case Studies Peter K. Schoeman, Sander E. Hoogewoning, Carlota Montori I. Blanch, Paul G. J. Sistermans and Odelinde E. Nieuwenhuis	3186
The Application of New Approaches for Developing Shoreline Management Plans Kevin Burgess and Helen Jay.....	3196
Sea Level Rise and Coastal Zone Risk in the Netherlands J. K. Vrijling, P. van Gelder and M. Kok	3207
Monitoring Requirements for Habitat Creation Schemes Natalie J. Frost, Stephen C. Hüll and Nigel I. Pontee	3217
Calibration of Water Quality Model for the Nutrient Distribution in the Meldorf Bight, Germany Piyamarn Leangruxa, Karl-J. Hesse and Roberto Mayerle	3228
Wastewater Outfalls for Coastal Cities Donald D. Treadwell, Brian J. Van Weele and Yair Eisenberg	3239
Environmental Design of Bilbao Submarine Outfall (Spain) Andres Garcia, Cesar Álvarez, Jose A. Revilla, Jose A. Juanes and Raúl Medina	3251
Distinguishing Project Effects From Natural Causes Herman C. Miller, Edward F. Thompson, Jesse E. McNinch, Alan K. Zundel and William A. Dennis	3264
Improving the Navigability and Safety Conditions in Douro Estuary Inlet Adelio J. R. Silva, Carlos Abecasis and Jose Chambel Leitão	3277
Improving Navigation Conditions and Safety in the Mouth of the River Douro (Portugal) A. Guedes-de-Campos, Ricardo B. Carvalho, I. Mota-Oliveira, A. Trigo-Teixeira and Tim Chesher.....	3290

Modernisation of the Vistula River Outlet — Optimisation of the Jetties by Modelling Approach Dariusz Gajsiorowski, Jaroslaw Kapiński, Tomasz Kolerski, Rafał Ostrowski, Malgorzata Robakiewicz, Marek Skaja and Marek Szmytkiewicz	3303
Hydrodynamics and Transport in the Coastal Zone of São Paulo - Brazil Paulo C. Leitão, Jose C. Leitão, Ramiro Neves, Gilberte Berzin and Adelio J. R. Silva.....	3316
New Restoration Work from Damage of Waterproof Sheet at Ash Disposal Site Tsutomu Sakakiyama	3329
A Study of Navigation Channel Subject to Regular Dredgings Using Eigenfunction Analysis: The Adour River Mouth France Philippe Maron, Didier Rihouey and Jean Dubranna.....	3342
Minimizing the Impacts of Reclamation Dredging at Cape Town Stephen Luger, Geoffrey Smith and J. S. Schoonees	3354
Beach Nourishments and Littoral Longshore Transport Interrupted by a Marina: L'Hospitalet Case Study J. Galofre, F. J. Montoya and T. Villanueva	3365
Predictive Model of Change in Longitudinal Profile in Beach Nourishment Using Sand of Mixed Grain Size Takaaki Uda, Takayuki Kumada and Masumi Serizawa	3378

VOLUME FOUR [↑](#)

Preserving System of Nourished Beach by a Distorted Ripple Mat Nobuyuki Ono, Isao Irie and Hiroshi Yamaguchi	3391
Behaviour of a Meganourishment on a High Energy Coastline Geoffrey G. Smith, Christoph Soltau and Emma C. Gorge.....	3404
Protection of Recessive Coasts by Combined Beach Nourishment and Supporting Structures - A Contribution to Coastal Flood Defence Hans-H. Dette and Hocine Oumeraci	3416
Rehabilitation Study of Coastal Defence Works and Artificial Sand Nourishment at Costa da Caparica, Portugal F. Veloso-Gomes, F. Taveira-Pinto and J. Pais-Barbosa	3429

Beach Re-Nourishment at Playa de Villanitos, Spain Guillermo M. Diaz Mendez, Christian M. Appendini, Jose Maria Medina Villaverde, Jorge Rey Salgado, Miguel Fernández Covarsi and Francisco Penalver Garcerán	3442
A Critical Review of Urban Beach Nourishment Projects in Cadiz City after Twelve Years Gregorio Gómez-Pina, Juan J. Mufioz-Perez, Lorenzo Fages, Jose L. Ramirez, Javier Enriquez and Jesus de Sobrino	3454

Marine Ecosystem Enhancement on a Geotextile Coastal Protection Reef- Narrowneck Reef Case Study Leslie (Angus) Jackson, Russell E. Reichelt, Simon Restall, Bobbie Corbett, Rodger Tomlinson and John McGrath	3940
Methodology for Assessing the Impact of Climate Change Upon Coastal Defence Structures Ian Townend and Kevin Burgess	3953
Characteristics and Design Implications of Breaking Wave Impacts Geoffrey Bullock, Charlotte Obhrai, Gerald Müller, Guido Wolters, Howell Peregrine and Henrik Bredmose	3966
Nonlinear Interactions and Wave Run-Up Near a Gravity Base Structure E. Jamois, O. Kimmoun, B. Molin and Y. Stassen	3979
Wave Loading on Monopile Foundation for Offshore Wind Turbines in Shallow-Water Areas Marilyne Luck and Michel Benoit	3992
Water Wave Impact on Walls and the Role of Air D. H. Peregrine, H. Bredmose, G. Bullock, C. Obhrai, G. Müller and G. Wolters	4005
Theoretical Formulae for Wave Slamming Loads on Slender Circular Cylinders and Application for Support Structures of Wind Turbines Jan Wienke, Uwe Sparboom and Hocine Oumeraci	4018
Field and Large Scale Model Tests of Wave Impact Pressure Propagation into Cracks Guido Wolters, Gerald Müller, Geoffrey Bullock, Charlotte Obhrai, Howell Peregrine and Henrik Bredmose.....	4027
Investigation of Input Data for the Dimensioning of Groyne Piles Frank Weichbrodt, Christian Dede, Joerg Radomski and Soeren Kohlhase	4040

Wave Impacts at Sea Walls Giovanni Cuomo and William Allsop.....	4050
Numerical Simulation of Wave Transmission and Forces on Flap-Type Storm Surge Barrier Takashi Tomita, Koji Kawasaki and Kenichiro Shimosako	4063
Violent Wave Impacts on Vertical and Inclined Walls: Large Scale Model Tests Charlotte Obhrai, Geoffrey Bullock, Guido Wolters, Gerald Müller, Hovvell Peregrine, Henrik Bredmose and Joachim Grüne	4075
Wave Forces on Crown Walls: Evaluation of Existing Empirical Formulations Paula Camus Bafia and Jorge Flores Guillen	4087
Numerical Simulation of Water Wave Impacts using a Navier-Stokes Solver T. Q. Li, P. Troch, J. De Rouck and D. Goossens	4100
Probability of Occurrence of Wave Loading on Jetty Deck Elements Ridha Bentiba, Giovanni Cuomo, William Allsop and Nigel Bunn	4113
Design Guidelines for Low Crested Structures Hans F. Burcharth and Alberto Lamberti.....	4126
Stability of Block Revetments on Low Crested Breakwaters M. Klein Breteler, H. J. Regeling, Theo Stoutjesdijk and J. C. P. Johanson	4139
Wave Transmission at Low-Crested Structures, Including Oblique Wave Attack Jentsje W. van der Meer, Riccardo Briganti, Baoxing Wang and Barbara Zanuttigh.....	4152
Physical Model Study of Water Piling-Up Behind Low-Crested Structures Piero Ruol, Alberto Faedo and Alessandro Paris	4165
Wave Run-Up, Overtopping and Percolation Over Low Crested Structures Alberto Lamberti, Barbara Zanuttigh and Luca Martinelli	4178
Scour Around the Head of the West Breakwater of Mailliao Industrial Harbor Kao-Shu Hwang, Hwung-Hweng Hwung and Jin-Yih Liou.....	4191

Observations of Momentan/ Liquefaction Caused by Breaking Waves Around a Coastal Structure Mathieu Mory, Herve Michallet, Stephane Abadie, Ismael Piedra-Cueva, David Bonjean, Pierre Breul and Mathieu Cassen	4204
Testing of the Interaction of Coastal Windfarm Foundations with the Seabed: Scour and Liquefaction Richard J. S. Whitehouse, Scott L. Dünn, John S. Alderson and Pui Lee Vun	4215
Wave-Induced Forces on Structural and Biotic Elements of Low-Crested Structures Matteo Tirindelli and Alberto Lamberti.....	4228
Flow at Low-Crested Structures Under Breaking Conditions Nicolas Garcia, Javier L. Lara, Pedro Lomonaco and Inigo J. Losada	4240
Infiltration of Overtopping Water in a Breakwater Crest Henk Jan Verhagen, Jeroen Steenaard and Thieu Quang Tuan.....	4253
Safety Under Wave Overtopping - How Overtopping Processes and Hazards are Viewed by the Public William Allsop, Tom Bruce, Jon Pearson, Leopoldo Franco, Jo Burgon and Christine Ecob	4263
Neural Network Modelling of Wave Overtopping Over Coastal Structures Beatriz Pozueta, Marcel R. A. Van Gent, Henk Van Den Boogaard and JosepR. Medina	4275
Wave Overtopping at Ostia Yacht Harbour Breakwater: Comparison Between Field Measurements and Model Tests in 2D and 3D Jimmy Geeraerts Peter Troch Julien De Rouck, Marc Willems, Leopoldo Franco, Giorgio Bellotti and Riccardo Briganti	4288
The International Database on Wave Overtopping Gosse Jan Steendam, Jentsje W. van der Meer, Hadewych Verhaeghe, Phil Besley, Leopoldo Franco and Marcel R. A. van Gent	4301
Performance of Seawalls against Wave Overtopping and Damage Minoru Flanzawa, Nobufumi Yamagata, Takami Nishihara, Yasuhiro Umezaki, Isao Tanaka, Tomotsuka Takayama, Shigeo Takahashi and Ryoichi Tomiyasu	4314
Overtopping and Rear Slope Stability of Reshaping and Non-Reshaping Berm Breakwaters T. Lykke Andersen and H. F. Burcharth	4326

Applicability of On-Site Wave Overtopping Sensor Tetsuya Hiraishi, Masaki Hattori, Katsuya Hirayama, Toshihiko Nagai and Tomohiro Yasuda	4341
Effect of Water Depth and Surface Roughness on Wave Run-Up Janaka J. Wijetunge	4354
Development of Non Wave-Overtopping Type Seawall in Deep Water Masaru Yamashiro, Akinori Yoshida and Isao Irie.....	4367
Violent Wave Overtopping at Samphire Hoe: Field and Laboratory Measurements Tim Pullen, William Allsop, Tom Bruce, Jonathan Pearson and Jimmy Geeraerts	4379
Prediction of Low Overtopping Rates on Embankment Structures Alice Le Für, Tim Pullen and William Allsop	4391
Effectiveness of Recurve Walls in Reducing Wave Overtopping on Seawalls and Breakwaters Jon Pearson, Tom Bruce, William Allsop, Andreas Kortenhaus and Jentsje van der Meer	4404
Wave Overtopping of Shallow Sloping Seawalls: Extension and Refinement of Empirical Prediction Methods Ibrahim Bay, Terry Hedges, Mohamed Shareef and Tim Pullen	4417
Spatial Variability and Foreshore Influence on Overtopping Joaquin M. Garrido, Jose A. González-Escrivá, Josep R. Medina and Andreas Kortenhaus	4430
Extended Shallow Water Prediction of Overtopping J. Shiach, C. G. Mingham, D. M. Ingram, D. M. Causon, T. Bruce, J. Pearson and N. W. H. Allsop	4443
Laboratory Effects and Further Uncertainties Associated with Wave Overtopping Measurements A. Kortenhaus, H. Oumeraci, J. Geeraerts, J. de Rouck, J. R. Medina and J. A. González-Escrivá	4456
Violent Wave Overtopping on Vertical and Inclined Walls: Large Scale Model Tests Joachim Grüne, Zeya Wang, Geoffrey Bullock and Charlotte Obhrai	4469
Violent Overtopping of Vertical Seawalls under Oblique Wave Conditions Nicolas Napp, Tom Bruce, Jonathan Pearson and William Allsop	4482

Wave Damping in Rubble Mounds M. Muttray and H. Oumeraci.....	4494
Structural Integrity of XBLOC® Breakwater Armour Units Prototype and Numerical Drop Tests Ronald Hakenberg, Ineke Vos-Rovers, Bas Reedijk and Markus Muttray	4507
Linear Shoaling and Non-Linear Analysis of a New Type of Extended Boussinesq Model P. Gomi, P. Sergent and K. Meftah.....	4520
Tides in Coastal Areas from Altimeter Data Charles J. Calkoen.....	4534
Extreme Transport of Sediment due to Turbidity Currents in Coastal Waters Leo C. van Rijn.....	4547
Numerical Wave Flume Simulations of Seawater Overtopping D. M. Ingram, F. Gao, D. M. Causon, C. G. Mingham and P. Troch	4560
