Climate Change Costs to Ports and Waterways: Scoping the Business Case Assessment for Investment in Adaptation

Permanent Task Group for Climate Change
Technical Note No. 2 – 2024

TECHNICAL NOTE N° 2

PERMANENT TASK GROUP FOR CLIMATE CHANGE

Climate Change Costs to Ports and Waterways: Scoping the Business Case Assessment for Investment in Adaptation

16 July 2024

PIANC has Technical Commissions concerned with inland waterways and ports (InCom), coastal and ocean waterways (including ports and harbours) (MarCom), environmental aspects (EnviCom) and sport and pleasure navigation (RecCom).

This Technical Note has been produced by the Permanent Task Group for Climate Change (PTG CC), a PIANC cross-Commission Task Group of experts, representing several countries and stakeholder organisations.

The objective of this Note is to provide information and recommendations on good practice. Conformity is not obligatory and engineering judgement should be used in its application, especially in special circumstances. The Note should be seen as an expert guidance and state-of-the-art on this particular subject. PIANC disclaims all responsibility in the event that it is presented as an official standard.

CONTENTS

ABSTRACT	6
Acknowledgements	7
1 Introduction	8
1.1 Background	8
1.1.1 How is the Climate Changing?	8
1.1.2 How will these changes affect ports and waterways?	8
1.1.3 What Are the Wider Implications of the Changing Climate?	11
1.1.4 The Need for Action.....	12
1.2 Climate-Related Risks, Responses and Associated Costs.....	12
1.2.1 How Are Risks Changing?	12
1.2.2 What Can Port and Waterway Operators Do?	14
1.3 Technical Note Objectives	15
1.4 Technical Note Structure	16
2 Climate Change and Extreme Weather Impacts	17
2.1 Consequences and Costs of Extreme Hydro-Meteorological and Oceanographic Events.....	17
2.1.1 Direct and Indirect Costs and Losses.....	17
2.1.2 Navigation Sector Climate Change Surveys	17
2.1.3 Others' Findings	18
2.2 Perceptions of Changes in Extreme Event Frequency or Severity.....	19
2.2.1 Navigation Sector Climate Change Surveys	19
2.2.2 Others' Findings	20
2.3 Climate Change Action to Date	21
2.4 Overall Survey Findings	23
3 What Factors Limit or Enable Adaptation Action?	24
3.1 Limiting Factors.....	24
3.2 Enabling Conditions for Adaptation.....	25
4 Adaptation Drivers Relevant to the Ports and Waterways Sector	27
4.1 Existing and Recent Adaptation Drivers	27
4.2 Increasingly Frequent or Severe Extreme or Atypical Events	28
4.2.1 Reputational Risks	31
4.3 Awareness of Supply Chain Consequences of Extreme Events and Other Incidents ..	31
4.4 Evolving Good Practice in the Insurance Sector	33
4.5 Evolving Position of the Finance Sector	35

4.6	Climate Change Risk Disclosure and Reporting	36
4.6.1	Incremental vs. Transformational Change	38
4.7	Government Commitments	38
4.7.1	Climate-Proofing New Developments.....	40
4.8	Legal Challenges and Liability Issues	40
5	Scoping the Business Case for Adaptation	41
5.1	Context	41
5.1.1	Reminder: Aim of the Technical Note	42
5.2	Understanding the Risks	43
5.2.1	Risk Assessment as Part of the Adaptation Planning Process	44
5.3	Recognising and Quantifying the Consequences of Inaction	47
5.4	Consequences of Inaction at Port or Facility Level	48
5.4.1	Quantifying the Financial Risk.....	49
5.5	Consequences of Inaction at System Level	50
5.5.1	Understanding System-Level Risks	54
5.6	Consequences of Inaction for Supply Chains and Wider Economic and Societal Wellbeing	55
5.7	Additional Costs, Benefits and Opportunities.....	57
5.8	Quantifying the Benefits of Adaptation	58
5.8.1	Measuring Adaptation Success	60
6	Overview	63
6.1	Context	63
6.2	Consequences of Inaction: Key Questions	63
6.3	Other Potentially Relevant Business Case Considerations.....	64
6.4	Conclusion	65
7	References	67
	Appendix 1	73
