TECHNICAL-BIOLOGICAL BANK PROTECTIONS FOR INLAND WATERWAYS PART 2: LIBRARY OF MEASURES

InCom Working Group Report N° 128 part 2 – 2025

PIANC REPORT N° 128 part 2
INLAND NAVIGATION COMMISSION

**TECHNICAL-BIOLOGICAL BANK
PROTECTIONS FOR INLAND WATERWAYS
PART 2: LIBRARY OF MEASURES**

7 January 2025

PIANC has Technical Commissions concerned with inland waterways and ports (InCom), coastal and ocean waterways (including ports and harbours) (MarCom), environmental aspects (EnviCom) and sport and pleasure navigation (RecCom).

This report has been produced by an international Working Group convened by the Inland Navigation Commission (InCom). Members of the Working Group represent several countries and are acknowledged experts in their profession.

The objective of this report is to provide information and recommendations on good practice. Conformity is not obligatory and engineering judgement should be used in its application, especially in special circumstances. This report should be seen as an expert guidance and state-of-the-art on this particular subject. PIANC disclaims all responsibility in the event that this report should be presented as an official standard.

TABLE OF CONTENTS

1	INTRODUCTION	14
2	BASIC TYPES	17
2.1	Nine Recommended Methods from German DWA M-519's Code of Practice on Technical-Biological Bank Protections for Inland Waterways	17
2.1.1	Reed mat with Vegetation Roll as Foot Protection (DWA BW 1)	17
2.1.2	Pre-Vegetated Slope Mat with Grass (DWA BW 2)	19
2.1.3	Pre-Vegetated Slope Mat with Hardwood Cuttings (DWA BW 3)	21
2.1.4	Willow Weave (DWA BW 4)	22
2.1.5	Living Fascine with Hardwood Cuttings (DWA BW 5)	24
2.1.6	Vegetated Geotextile Bundles with Hedge-Brush Layers (DWA BW 6)	25
2.1.7	Chamber Revetment (DWA BW 7, Vegetated Stone Mattresses, Reed Gabions)	28
2.1.8	Willow-Brush Mattresses with Heavy Rip Rap as Toe Reinforcement (DWA BW 8)	29
2.1.9	Vegetated Rip Rap (DWA BW 9)	31
2.1.10	Scores in Tables AFT, AFE, AST and ASE for DWA-M-519	33
2.2	British Waterway Management Guide (1999)	37
2.2.1	Grass Revetment (G)	37
2.2.2	Reed Planting (R)	41
2.2.3	Live Willow on Toe and Bank (W)	44
2.2.4	Grassed Composites (Grass and Geotextiles in the WMG, GG)	49
2.2.5	Toe Rolls (Timber and Vegetation, Toe, TV, in WMG)	53
2.2.6	Toe Geotextiles, Fibre Rolls (Toe, TG)	55
2.2.7	Rock and Fibre Rolls (Toe, RF)	58
2.2.8	Vegetated Open-Cell Revetment (Bank, CR)	60
2.2.9	Vegetated Stone Revetment and Toe Protection (Toe and Bank, SR)	63
2.2.10	Vegetated Concrete-Units Revetment (CU)	67
2.2.11	Scores in Tables AFT, AFE, AST and ASE for UK Waterway Management Guide	73
2.3	UK Green Approaches in River Engineering – Supporting Implementation of Green Infrastructure	76
2.3.1	Willow Spiling and Bundles	76
2.3.2	Turf or Vegetated Reinforced Mattresses and Seeded Geotextile (For Example, Seeded Coir Matting) with Rock Rolls as Toe Protection	79
2.3.3	Live Root Wads	81
2.3.4	Willow-Brush Mattresses on Coir Matting with Stick Bundles (Faggots), Rock Rolls, and Logs as Toe Protection	85

2.3.5	Scores in Tables AFT, AFE, AST and ASE for UK Green Approaches in River Engineering.....	88
3	FACT FILES.....	90
3.1	Waterways with Low Water-Level Fluctuations – Canals, Strongly Canalised Rivers, and Still Water	90
3.1.1	Weak Ship-Induced Impacts	90
3.1.2	Average Ship-Induced impacts.....	109
3.1.3	Strong Ship-Induced Impacts	156
3.1.4	Scores in Tables AFT, AFE, AST and ASE for Waterways with Low Water-Level Fluctuations.....	181
3.2	Waterways with Moderate Water-Level Fluctuations up to Highest Shipping Level – Generally Impounded Rivers.....	185
3.2.1	Weak Ship-Induced Impacts	185
3.2.2	Average Ship-Induced Impacts.....	199
3.2.3	Strong Ship-Induced Impacts	224
3.2.4	Scores in Tables AFT, AFE, AST and ASE for Waterways with Moderate Water-Level Fluctuations	235
3.3	Waterways with High Water-Level Fluctuations – Generally Free-Flowing Rivers	238
3.3.1	Weak Ship-Induced Impacts	238
3.3.2	Average Ship-Induced Impacts.....	253
3.3.3	Strong Ship-Induced Impacts	275
3.3.4	Scores in Tables AFT, AFE, AST and ASE for Waterways with Low Water-Level Fluctuations.....	295
4	DETAILED DESIGN	299
4.1	Waterways with Low Water-Level Fluctuations – Canals, Strongly Canalised Rivers, and Still Water	299
4.1.1	Shallow-Water Zone Behind Parallel Dam on the Brussels–Scheldt Canal – Humbeek, Belgium	299
4.1.2	Shallow-Water Zone Behind Sheet-Pile Wall on the Brussels–Scheldt Canal – Humbeek, Belgium	308
4.2	Waterways with Moderate Water-Level Fluctuations up to Highest Shipping Level – Generally Impounded Rivers.....	316
4.2.1	Projected Wide Shallow-Water Zone Behind a Sheet-Pile Wall with Various Adjustable Top and Underwater Openings – Spree-Havel Confluence, Berlin, Germany	316
4.3	Waterways with High Water-Level Fluctuations – Free-Flowing Rivers.....	323
4.3.1	Vegetated Rip Rap – River Rhine, Worms, Germany	323
4.3.2	Vegetated Gabions (Reed Gabions) – River Rhine, Worms, Germany	338
4.3.3	Living-Brush Mattresses – River Rhine, Worms, Germany	353
4.4	Scores in Tables AFT, AST, AFE and ASE Concerning Detailed Designs	368

LIST OF TABLES

Table 2-1: Table AFT–Scores of basic-type methods (BTs) from the DWA M-519 code of practice	33
Table 2-2: Table AFE – Scores of BTs from the DWA M-519 code of practice	34
Table 2-3: Table AST – Scores of BTs from the DWA M-519 code of practice	35
Table 2-4: Table ASE – Scores of BTs from the DWA M-519 code of practice	36
Table 2-5: Example overview table incorporated into comprehensive table in Chapter 4.1 of Part 1	40
Table 2-6: Reed species for planting at European implementation sites (Note: Phragmites australis considered invasive in North America)	44
Table 2-7: Maximum flow velocity with corresponding wave heights and impact scores for grassed composite method	52
Table 2-8: Table AFT – Scores of BTs from the UK Waterway Management Guide [WMG, 1999]	73
Table 2-9: Table AFE – Scores of BTs from WMG (1999)	74
Table 2-10: Table AST – Scores of BTs from WMG (1999)	75
Table 2-11: Table ASE – Scores of BTs from WMG (1999)	76
Table 2-12: Ecological effects on taxa, habitats, and key ecological processes for willow spiling	79
Table 2-13: Ecological effects on taxa, habitats, and key ecological processes for reinforced mattresses with seeded geotextile and toe protection.	81
Table 2-14: Ecological effects on taxa, habitats, and key ecological processes for live root wads ..	84
Table 2-15: Ecological effects on taxa, habitats, and key ecological processes for willow-brush mattresses	87
Table 2-16: Table AFT – Scores of BTs from Green Approaches in River Engineering	88
Table 2-17: Table AFE – scores of BTs from Green Approaches in River Engineering	88
Table 2-18: Table AST – scores of BTs from Green Approaches in River Engineering	89
Table 2-19: Table ASE – scores of BTs from Green Approaches in River Engineering	89
Table 3-1: AFT – Scores of FFs concerning low water-level changes (canals, strongly canalised rivers, still water)	182
Table 3-2: AFE – Scores of FFs concerning low water-level changes (canals, strongly canalised rivers, still water)	183
Table 3-3: AST – Scores of FFs concerning low water-level changes (canals, strongly canalised rivers, still water)	184
Table 3-4: ASE – Scores of FFs concerning low water-level changes (canals, strongly canalised rivers, still water)	185
Table 3-5: AFT – Scores of FFs for moderate water-level fluctuations up to the highest shipping level (generally impounded rivers).	236
Table 3-6: AFE – Scores of FFs for moderate water-level fluctuations up to the highest shipping level (generally impounded rivers)	236
Table 3-7: AST – Scores of FFs for moderate water-level fluctuations up to the highest shipping level (generally impounded rivers)	237
Table 3-8: ASE – Scores of FFs for moderate water-level fluctuations up to the highest shipping level (generally impounded rivers)	238
Table 3-9: Root growth rate versus time	278

Table 3-10: Root crown width versus time	278
Table 3-11: Root depth versus cross-sectional area	278
Table 3-12: Comparison of root diameter, pulling force, and maximum tensile strength	279
Table 3-13: AFT – Scores of FFs for high water-level fluctuations (generally free-flowing rivers)	295
Table 3-14: AFE – Scores of FFs for high water-level fluctuations (generally free-flowing rivers)	295
Table 3-15: AST – Scores of FFs for high water-level fluctuations (generally free-flowing rivers)	297
Table 3-16: ASE – Scores of FFs for high water-level fluctuations (generally free-flowing rivers)	298
Table 4-1: AFT – Scores of CSs	368
Table 4-2: AFE – Scores of CSs	369
Table 4-3: AST – Scores of CSs	370
Table 4-4: ASE – Scores of CSs	371
