## SUSTAINABLE MANAGEMENT OF THE NAVIGABILITY OF NATURAL RIVERS

InCom Working Group N° 236 – June 2024

# PIANC REPORT N° 236

INLAND WATERWAYS AND PORTS COMMISSION

## SUSTAINABLE MANAGEMENT OF THE NAVIGABILITY OF NATURAL RIVERS

June 2024

PIANC has Technical Commissions concerned with inland waterways and ports (InCom), coastal and ocean waterways (including ports and harbours) (MarCom), environmental aspects (EnviCom) and sport and pleasure navigation (RecCom).

This report has been produced by an international Working Group convened by the Inland waterways Commission (InCom). Members of the Working Group represent several countries and are acknowledged experts in their profession.

The objective of this report is to provide information and recommendations on good practice. Conformity is not obligatory and engineering judgement should be used in its application, especially in special circumstances. This report should be seen as an expert guidance and state-of-the-art on this particular subject. PIANC disclaims all responsibility in the event that this report should be presented as an official standard.

# TABLE OF CONTENTS

<b>EXECUTIVE SUMMARY .....</b>	<b>7</b>
<b>PREAMBLE.....</b>	<b>7</b>
<b>1 INTRODUCTION .....</b>	<b>8</b>
1.1 Classification of River Systems Within a Navigation Context .....	9
1.2 Navigability of Natural Rivers .....	13
1.3 Terms of Reference .....	14
1.4 Related PIANC Reports .....	15
1.5 Members of the Working Group.....	16
1.6 Meetings and Schedule .....	16
1.7 Report Layout and Guidance to the Reader .....	17
1.7.1 Report Layout.....	17
1.7.2 Guidance to the Reader .....	17
1.8 Acknowledgements .....	18
<b>2 NAVIGABILITY IMPROVEMENT PLANNING .....</b>	<b>20</b>
2.1 Institutional Development .....	21
2.1.1 General .....	21
2.1.2 Cross-Border Trade and Transport Agreements.....	21
2.2 Development of a River Improvement Masterplan .....	23
2.2.1 Planning Framework and Process (Feasibility Phase).....	23
2.2.1.1 Step 1: System Analysis .....	24
2.2.1.2 Step 2: Identification of Possible Measures.....	24
2.2.1.3 Step 3: Selection of Possible Measures .....	24
2.2.1.4 Step 4: Combination of Selected Measures into Strategies .....	24
2.2.1.5 Step 5: Impact Assessment .....	24
2.2.1.6 Step 6: Optimisation and Mitigation .....	24
2.2.1.7 Step 7: Choice of Preferred Strategy .....	25
2.2.2 Technical Assessments Performed in the Planning Phases .....	25
2.2.2.1 Hydrological and Hydraulic Studies .....	25
2.2.2.2 Fluvial Geomorphology and Sediment Transport Studies .....	29
2.2.2.3 River Modelling Studies.....	32
2.2.2.3.1 Numerical Modelling.....	33
2.2.2.3.2 Physical Modelling.....	35
2.2.2.3.3 Choice Between Numerical and Physical Modelling for Assessing Navigability Improvements .....	36
2.2.2.4 Uncertainty and Risk and its Applicability in Navigation Planning Studies.....	37
2.3 Planning for Environmental and Climate Change Considerations of Natural Rivers.....	38
2.3.1 Working with Nature .....	38
2.3.2 Climate Resiliency and Preparedness .....	40
<b>3 DYNAMIC RIVER MANAGEMENT INTERVENTION .....</b>	<b>42</b>
3.1 Monitoring.....	44
3.1.1 Primary Datasets for Monitoring: Water Levels and Bathymetry .....	45
3.1.2 Morphological Monitoring .....	48
3.1.3 Environmental Monitoring .....	48
3.1.4 Miscellaneous Monitoring .....	48
3.2 System Knowledge .....	48

3.2.1	Basics.....	49
3.2.2	Morphological Trends.....	50
3.2.3	Sediment Budgets.....	53
3.3	River Information Services.....	56
3.3.1	Hydrographic Surveys and Electronic Navigation Charts (ENC).....	58
3.3.1.1	Traditional Surveys and ENCs.....	58
3.3.1.2	User-Generated Hydrographic Surveys and ENCs.....	58
3.3.2	Aids to Navigation.....	59
3.4	Maintenance of the Fairway.....	62
3.4.1	Dredging and Channel Maintenance.....	62
3.4.1.1	Traditional Channel Maintenance Dredging.....	62
3.4.1.2	Morphological and Smart Dredging.....	63
3.4.1.3	Dredge Disposal and Placement.....	65
3.4.1.4	Additional Physical Interventions: Removal of Rock and Other Obstructions.....	66
3.4.1.5	Monitoring and Success Control.....	67
3.4.2	Temporary, Adaptable, and Flexible Training Structures.....	67
3.4.2.1	Vessels as Temporary Structures.....	68
3.4.2.2	Low-Cost Materials for Temporary Structures.....	69
3.5	Medium- to Longer-Term Management.....	71
3.5.1	Sediment-Related Problems and Categorisation.....	71
3.5.2	Potential Measures: Example for Sediment Supply Issues – Deficit.....	72
3.5.2.1	Riverbed Armouring.....	72
3.5.2.2	Sediment Nourishment.....	72
3.5.2.3	Interventions Decreasing Bed Shear Stress.....	73
3.5.3	Overview: Preparation and Implementation of a Sediment Management Plan.....	73
<b>4</b>	<b>TRADITIONAL RIVER TRAINING INTERVENTIONS.....</b>	<b>74</b>
4.1	Classification and Analysis of River Training Works for Natural Rivers.....	74
4.2	Elements of Traditional River Training Works.....	76
4.2.1	Impermeable Groynes or Spur Dykes.....	76
4.2.1.1	Permeable Groynes (or Jetties).....	76
4.2.1.2	Notched Dykes.....	77
4.2.1.3	Stepped-Up Dykes.....	78
4.2.1.4	Longitudinal Dykes with Transverse Dykes.....	78
4.2.1.5	Chevrons or Flow-Dividing Dykes.....	78
4.2.1.6	Longitudinal Training Walls or Off-Bankline Revetments.....	79
4.2.2	Bank Revetment.....	79
4.2.2.1	Fixed Bed Layers.....	80
4.2.2.2	Bendway Weirs.....	81
4.2.2.3	Bottom Vanes.....	81
4.2.3	Meander Cutoffs and Oxbow Development.....	82
4.2.4	Design and Selection Considerations.....	83
4.3	Morphological Impacts and Mitigation of River Training Works.....	83
4.3.1	General.....	83
4.3.1.1	Reach-Scale Effects.....	83
4.3.1.2	Cross-Section-Scale Effects.....	84
4.3.1.3	Depth-Scale Effects.....	85
4.3.1.3.1	Non-Submerged Groynes.....	86
4.3.1.3.2	Submerged Groynes.....	86

4.3.1.4	Bank Vegetation Effects.....	86
4.3.2	System Response of Cutoff Channels.....	87
4.3.3	Response to Channel Closure.....	87
4.3.4	Impacts of Bank Protection.....	88
4.3.5	Long-Term Navigability.....	88
4.4	Navigation Manoeuvrability and Navigation Safety Considerations.....	89
4.4.1	Transverse Thrust at Groynes.....	89
4.4.2	Safety Distance at Groynes Fields.....	90
4.4.3	Underwater Hazard at River Training Structures.....	91
4.4.4	Rapid Changes in Water Depths (After High Flows).....	91
4.5	Additional Impacts of River Training Works.....	91
4.5.1	Flood Risk Management.....	91
4.5.2	Aquatic Ecology.....	92
4.5.3	Social Activities.....	94
<b>5</b>	<b>LONG-TERM MONITORING AND EVALUATION OF THE MANAGEMENT TOOLS.....</b>	<b>95</b>
5.1	General Approach to Long-Term Monitoring and Evaluation.....	95
5.1.1	Basic Aspects.....	95
5.1.2	General Approach for Inland Waterways.....	96
5.1.3	Prerequisites.....	97
5.2	Status of Navigability.....	97
5.3	Safety and Ease of Navigation.....	99
5.4	Volume of Goods and Passengers.....	100
5.5	Efforts, Costs and Cost-Benefit Analysis.....	101
5.6	Impacts on Other Uses.....	102
5.7	Hydromorphology and the Natural State of the River.....	102
5.7.1	General.....	102
5.7.2	Hydrological Regime.....	103
5.7.3	River Continuity.....	104
5.7.4	Morphological Conditions.....	105
<b>6</b>	<b>SUMMARY, RECOMMENDATIONS, AND CONCLUSIONS.....</b>	<b>107</b>
6.1	Summary.....	107
6.2	Recommendations.....	107
6.2.1	Improved Understanding of Evolutionary Processes in Natural Rivers.....	108
6.2.1.1	Chronicles of the Historical Evolution of Rivers.....	108
6.2.1.2	Adaptation of Rivers Impacted by Climate Change.....	108
6.2.2	Implementation of a Cyclical Approach of Navigability Improvement Measures.....	109
6.2.2.1	Monitoring.....	109
6.2.2.2	Evaluation.....	109
6.2.2.3	Planning.....	109
6.2.2.4	Execution.....	110
6.2.3	Sustainability of the Effects of Navigability Improvement Measures and Their Technical and Socio-Environmental Impacts.....	110
6.2.3.1	Dynamic Fairway Management.....	110
6.2.3.2	Morphological Dredging.....	111
6.2.3.3	Management of Hard Points and Obstacles.....	112
6.2.3.4	Traditional Measures.....	112
6.2.3.5	Socio-Environmental Impacts of Dredging.....	112
6.2.4	Analysis of the Effectiveness and Performance of Implemented Measures.....	112

6.2.4.1	Establish/Manage/Improve a Hydrographic Service.....	112
6.2.4.2	Operation and Maintenance of Aids to Navigation.....	113
6.2.4.3	Continuous Training Programme (Local or Outside Training) .....	113
6.3	Conclusions .....	114
<b>7</b>	<b>BIBLIOGRAPHY AND REFERENCES.....</b>	<b>115</b>
	<b>APPENDIX A: TERMS OF REFERENCE .....</b>	<b>122</b>
	<b>APPENDIX B – CASE STUDIES.....</b>	<b>118</b>
	Madeira River.....	124
	Inner Niger Delta.....	138
	Danube River.....	158
	Yangtze River.....	175
	Jamuna River .....	186
	Red River.....	194

## TABLES

Table 1-1:	Resulting guidance based on existing system conditions and future end state .....	9
Table 1-2:	Classification system of navigable rivers.....	10
Table 1-3:	Related PIANC reports to the PIANC 236 Working Group. The years correspond to literature references PIANC (year).....	15
Table 1-4:	PIANC WG 236 members.....	16
Table 2-1:	Morphological riverbed features at different scales, relevant for navigability .....	32
Table 2-2:	Potential selection criteria for the dimensionality of numerical models.....	35
Table 3-1:	Hydrography measurements used to improve navigation assistance tools .....	57
Table 3-2:	Aids-to-navigation assistance tools.....	57
Table 3-3:	Disposal methods and effects on river morphology.....	65
Table 4-1:	Classification of river training works.....	75

## FIGURES

Figure 1.1:	Types of rivers based on morphological confinement and discharge regulation .....	10
Figure 1.2:	Example of a Class A – Natural river in the context of navigation.....	11
Figure 1.3:	Example of a Class E – Highly regulated river in the context of navigation.....	12
Figure 2.1:	Cyclical nature of navigability improvement measures .....	20
Figure 2.2:	Relationships between activities for inland waterway transport projects.....	23
Figure 2.3:	Context of hydrologic and hydraulic studies for navigability improvement projects.....	26
Figure 2.4:	Example of the reduction level of the low water at a river gauge.....	27
Figure 2.5:	Low-water reference plane (LWRP) along the 330-km Tapajós River waterway.....	28
Figure 2.6:	Bedload and suspended load.....	29
