MarCom Working Group Report N° 211 – 2024

PIANC REPORT N° 211

MARITIME NAVIGATION COMMISSION

GUIDELINES FOR THE DESIGN, MANUFACTURING AND TESTING OF FENDER SYSTEMS 2024

March 2024

PIANC has Technical Commissions concerned with inland waterways and ports (InCom), coastal and ocean waterways (including ports and harbours) (MarCom), environmental aspects (EnviCom) and sport and pleasure navigation (RecCom).

This report has been produced by an international Working Group convened by the Maritime Commission (MarCom). Members of the Working Group represent several countries and are acknowledged experts in their profession.

The objective of this report is to provide information and recommendations on good practice. Conformity is not obligatory and engineering judgement should be used in its application, especially in special circumstances. This report should be seen as an expert guidance and state-of-the-art on this particular subject. PIANC disclaims all responsibility in the event that this report should be presented as an official standard.

TABLE OF CONTENTS

TABLE OF CONTENTS	4
LIST OF FIGURES	9
LIST OF TABLES	10
1 INTRODUCTION AND GENERAL ASPECTS	12
1.1 WG 211, A Completely New Guideline.....	12
1.2 Function of Guideline.....	12
1.3 Scope of Guideline	13
1.4 Climate Change	13
1.5 PIANC Certified Fenders and PIANC Type Approval.....	14
1.6 Members of Working Group 211	14
1.7 Meetings.....	15
1.8 Acknowledgements.....	15
1.9 Use of the Guidelines	16
2 INTRODUCTION TO THE PRINCIPLES OF FENDERING	17
2.1 General Design Approach.....	17
2.2 Fender Types and Systems	17
2.3 Fender Efficiency.....	19
2.3.1 Types of Buckling Fenders	19
2.3.2 Types of Sideloaded Fender.....	20
2.4 Fender Selection and Fender System Design.....	20
2.4.1 Buckling Fender Systems	21
2.4.2 Side Loaded Fender Systems	23
2.4.3 Side Loaded Floating Fenders.....	24
2.4.4 Special Applications.....	25
2.5 Ship-to-Ship Fendering	26
2.6 Fenders and Structures	27
3 PARTICULAR ASPECTS REGARDING DESIGN VESSELS	28
3.1 Vessel Characteristics	28
3.1.1 Overview	28
3.1.2 Container Vessels	28
3.1.3 Dry Bulk & Ore Carriers	29
3.1.4 Cruise Vessels	30
3.1.5 RoRo, RoPax & Vehicle (Car) Carriers	30
3.1.6 Tankers	31
3.1.7 Gas Carriers (LPG and LNG)	31
3.1.8 General Cargo, Refrigerated Cargo and Livestock Carriers	31
3.1.9 Passenger Ferries.....	32
3.1.10 Fishing Vessels	32
3.1.11 Offshore Supply Vessels & Harbour Tugs.....	33
3.1.12 Other Vessels.....	33
3.2 Displacement	33
3.3 Influence of Vessel Hull Characteristics on Fender Design	34
4 BASIS OF DESIGN	36
4.1 Functional Requirements.....	37
4.2 Operational Requirements.....	37
4.3 Site Conditions	38
4.4 Design Criteria, Return Period and Design Life	38
4.5 Operation and Maintenance	39

4.6	Reliability Requirements.....	40
5	BERTHING ENERGY	42
5.1	Berthing Manoeuvres and Navigation Conditions	42
5.1.1	Alongside Berthing (Parallel or Angular)	42
5.1.2	End Berthing (Longitudinal)	42
5.1.3	Ship-to-Ship Berthing.....	43
5.1.4	Navigation Conditions	43
5.2	Kinetic Energy of a Berthing Vessel.....	44
5.2.1	Fundamentals of Kinetic Energy Method.....	44
5.2.2	Design Berthing Energy	46
5.2.3	Characteristic Berthing Energy.....	46
5.3	Displacement of Vessel	47
5.4	Berthing Velocity	47
5.4.1	Berthing Velocity Based on Local Knowledge, Data and Experience	48
5.4.2	Transverse Velocity	48
5.4.3	Longitudinal Velocity.....	50
5.5	Berthing Angle	50
5.6	Eccentricity Factor	52
5.6.1	Distance r_F and Berthing Impact Point	53
5.6.2	Radius of Gyration	56
5.6.3	Vessel Centre of Mass	56
5.6.4	Eccentricity Factor for End Berthing	57
5.7	Added Mass Factor.....	57
5.7.1	Alongside Berthing	57
5.7.2	End Berthing	58
5.8	Partial Energy Factor	58
5.9	Ship-to-Ship Berthing	63
5.9.1	Berthing Manoeuvres	63
5.9.2	Ship-to-Ship Berthing Energy.....	64
5.9.3	Characteristic Berthing Velocity	65
5.9.4	Eccentricity Factor	66
6	FENDER SYSTEM SELECTION	67
6.1	Fender Selection Process and Role of the Designer	67
6.2	Fender Selection Overview	67
6.2.1	Fender Selection Using Project Specific Design Criteria	67
6.2.2	Fender Selection Using Pre-Set Design Criteria.....	70
6.3	Fender System Selection.....	70
6.4	Factors Influencing Fender System Selection	72
6.4.1	Bow Radius	73
6.4.2	Bow Flare	73
6.4.3	Fender System Pitch	75
6.4.4	Single Fender System Contact	77
6.4.5	Multiple Fender System Contact.....	77
6.4.6	Vessel Hull Structure.....	79
6.4.7	Vessel Belting.....	79
6.4.8	Double Hull Contact.....	81
6.4.9	Type of Supporting Structure	82
6.4.10	Flexible Dolphins	82
6.4.11	Fender System Elevation	84

6.4.12	Pneumatic and Foam Fenders.....	84
6.4.13	Number and Size of Fenders	85
6.4.14	Shear of Fenders	85
6.4.15	Submerged Fenders	86
6.4.16	Fender Orientation	86
6.4.17	Ageing Effects on Fenders.....	87
6.4.18	Non-Marking Fenders	88
6.4.19	Mooring Analysis	88
6.4.20	Permanent Mooring	89
6.5	Base Fender Performance.....	90
6.6	Correction Factors.....	91
6.6.1	Application of Correction Factors	91
6.6.2	Velocity Factor.....	92
6.6.3	Temperature Factor	93
6.6.4	Angular Factor	94
6.6.5	Multiple Fender Contact Factor	95
6.7	Determining Fender Design Performance	96
6.7.1	Application of Partial Resistance Factors.....	97
6.7.2	Fender Performance Partial Resistance Factor.....	100
6.7.3	Multiple Fender Contact Partial Resistance Factor	101
6.7.4	Load Partial Resistance Factor.....	102
6.8	Hull Pressure.....	102
6.8.1	Factors Affecting Induced Hull Pressure.....	103
6.8.2	Hull Structure	103
6.8.3	Recent Hull Pressure Research	105
6.8.4	Fender Reaction Force Distribution	107
6.8.5	Hull Pressure for Fender Panels	108
6.8.6	Hull Pressure for Cylindrical Fenders.....	109
6.8.7	Hull Pressure for Foam and Pneumatic Fenders	109
6.8.8	Typical Hull Pressure Capacities	109
6.9	Ship-to-Ship Fendering	111
6.9.1	Ship-to-Ship Fender Selection.....	111
6.9.2	Vessel Stand-off and Number of Fenders	112
6.9.3	Ship-to-Ship Operational Considerations	113
7	FENDER SELECTION UNDER MOORED CONDITIONS.....	114
7.1	Fender Design for Moored Vessels	114
7.2	Characterisation of Vessel and Berth Configuration.....	116
7.3	Mooring Analysis.....	117
7.4	Creep and Fatigue Assessment for Dynamic Mooring Situations	117
7.4.1	Creep and Cyclic Loading Limits for DMA	121
8	FENDER SYSTEM COMPONENT DESIGN.....	122
8.1	Fender Panel Design	122
8.1.1	Load Cases and Structural Analysis	122
8.1.2	Fender Panel Internal Structure.....	123
8.1.3	Edge Chamfers.....	124
8.1.4	Panel Size and Position.....	125
8.2	Chains and Fixings Design	126
8.2.1	Chain Types and Positions	126
8.2.2	Support Chains for Side Loaded Fenders.....	130

8.2.3	Bracket Design	131
8.2.4	Fixing Anchor Design	131
8.3	Low Friction Facing Design	133
8.3.1	Low Friction Resin Facings.....	134
8.3.2	Steel Facing.....	134
8.3.3	Fastenings.....	135
8.4	Parallel Motion Fender Systems.....	135
8.5	Fender Interfaces with Mooring Lines.....	136
8.6	Whole-Life Considerations.....	137
8.7	Corrosion of Fender Components.....	137
8.8	Marine Growth.....	138
8.9	Design of Fender Components in Icy Conditions	138
9	MANUFACTURING OF FENDER SYSTEMS	139
9.1	Manufacturer Qualifications	139
9.1.1	Quality Control by Manufacturer.....	139
9.1.2	Workforce Qualification.....	139
9.1.3	Storage of Produced Fender Elements	140
9.2	Rubber Fender Compound.....	140
9.2.1	Natural Rubber	140
9.2.2	Synthetic Rubber	141
9.2.3	Recycled Rubber.....	141
9.2.4	Fillers	141
9.2.5	Anti-Ageing Agents	142
9.2.6	Oil (Processing Aids)	142
9.2.7	Accelerators and Sulphur	142
9.2.8	Other Ingredients.....	142
9.3	Manufacturing Process of Rubber Fenders	142
9.3.1	Mixing of the Compound	143
9.3.2	Moulding, Extruding and Wrapping.....	143
9.3.3	Curing/Vulcanising of the Rubber Element	144
9.4	Fabrication of Steel Fender Panels	144
9.4.1	Panel Internal Structure	145
9.4.2	Material.....	146
9.4.3	Protection Against Corrosion for Steel Panels.....	146
9.5	Fabrication of UHMW-PE Low Friction Facing.....	147
9.6	Fabrication of Accessories	147
9.6.1	Chains	148
9.6.2	Anchors and Accessories	148
9.6.3	Protection Against Corrosion for Accessories	148
9.7	Pneumatic Fenders	149
9.8	Foam Fenders	149
10	TEST PROCEDURES OF MARINE FENDERS.....	150
10.1	Classification of Rubber Fender Testing	150
10.2	Determination of Fender Base Performance	153
10.2.1	Constant Velocity (CV)	153
10.2.2	Standard compression and Base performance.....	153
10.2.3	Standard condition	153
10.3	Test Apparatus for Compression Test	153
10.4	Supporting Protocols.....	154

10.4.1	Break-In Compression Cycle	154
10.4.2	Stabilising Compression Cycles	154
10.4.3	Thermal Stabilisation	154
10.5	Performance Testing Protocol for Standard Compression	155
10.6	Protocol for Durability Test	158
10.7	Material Tests	160
10.7.1	Rubber Compound: Physical Properties	160
10.7.2	TGA (Thermogravimetric Analysis)	163
10.7.3	Test Protocol for Creation of Velocity Factors	163
10.7.4	Test Protocol for Creation of Temperature Factors (C _t)	165
10.7.5	Test Protocol for Angle Factor	166
10.8	Rubber Compounds for Pneumatic Fenders.....	167
10.9	Performance Tests of Pneumatic Fenders	167
10.10	Classification of Foam Fender Testing.....	168
10.11	Material Tests for Foam Fenders.....	169
10.11.1	Foam Core	169
10.11.2	Polyurethane (Solvent Free) Outer Layer Elastomer or Similar Material.....	169
10.11.3	Reinforcement Layer.....	170
10.12	Performance Tests of Foam Fenders	170
10.12.1	Fundamental and Type Approval Tests for Foam Fenders.....	170
10.12.2	Velocity, Angular and Temperature Factor for Foam Fenders	171
10.12.3	Durability Tests.....	172
10.12.4	Skin Thickness and Foam Density Verification Testing.....	172
10.12.5	Fender Pull-Through Test.....	173
10.13	Tests for Accessories	174
10.13.1	Fabricated Steel Structures Air-Leakage/Pressure Test Procedure.....	174
10.13.2	NDT (Non- Destructive Testing – All Fabricated Steel Parts)	174
	UHMW-PE Resin and Pads	175
11	INSTALLATION, INSPECTION AND MAINTENANCE	176
11.1	Installation	176
11.1.1	Handling and Installation	176
11.1.2	Safety and Accessibility	176
11.2	Spares and Storage	177
11.2.1	Spares	177
11.2.2	Storage	177
11.3	Inspection and Maintenance	177
11.3.1	Inspection.....	178
11.3.2	Maintenance	179
11.3.3	Emerging Technology	181
12	SUSTAINABILITY OF FENDERS	182
12.1	Circular Economy with Rubber Fenders.....	182
12.2	Carbon Footprint.....	182
12.3	Rubber Sourcing.....	183
12.4	Fabrication.....	183
12.5	Fender Design and Materials Selection	184
12.6	Recycling	184
12.6.1	Current Practice of Fender Recycling.....	185
12.6.2	Rubber Recycling	185
12.6.3	Foam Fender Recycling.....	186

12.6.4	Steel Recycling	186
12.6.5	UHMW-PE Recycling	187
12.7	Recommendations for Fender Sustainability	187
