PIANC REPORT N° 192

INLAND NAVIGATION COMMISSION

REPORT ON THE DEVELOPMENTS IN THE AUTOMATION AND REMOTE OPERATION OF LOCKS AND BRIDGES

2019

PIANC has Technical Commissions concerned with inland waterways and ports (InCom), coastal and ocean waterways (including ports and harbours) (MarCom), environmental aspects (EnviCom) and sport and pleasure navigation (RecCom).

This report has been produced by an international Working Group convened by the Inland Navigation Commission (MarCom). Members of the Working Group represent several countries and are acknowledged experts in their profession.

The objective of this report is to provide information and recommendations on good practice. Conformity is not obligatory and engineering judgement should be used in its application, especially in special circumstances. This report should be seen as an expert guidance and state-of-the-art on this particular subject. PIANC disclaims all responsibility in the event that this report should be presented as an official standard.

TABLE OF CONTENTS

1	INTRODUCTION	5
1.1	Scope	5
1.2	Introduction	5
1.2.1	Structure of the Report	5
1.2.2	Reference Projects	6
1.2.3	Related PIANC Reports	7
1.2.4	Members of the Working Group	7
1.2.5	Meetings	9
2	MANAGEMENT SUMMARY	10
3	BUSINESS CASE DEVELOPMENT FOR REMOTE OPERATION AND AUTOMATION	11
3.1	Introduction to Business Case Development	11
3.2	Benefits vs. Costs	11
3.2.1	Benefits	12
3.2.1.1	One-Off/Non-recurring	12
3.2.1.2	Recurring	13
3.2.2	Costs	14
3.2.2.1	One-off/Non-recurring	14
3.2.2.2	Recurring	14
3.2.3	Risks	14
3.2.4	Opportunities	15
3.3	Notes on the Business Case	15
3.3.1	Implementation	15
3.3.2	Life Cycle of Control and Network Equipment	16
3.3.3	Design, Construction, Operation and Maintenance	16
3.3.4	Risk Assessment	17
3.3.5	Economies of Scale	17
3.3.6	Communication Network	17
3.3.7	Rallying External Stakeholders to Help Promoting a Project	18
3.4	Current Situation in the Different Countries	18
3.5	Operating Methods	24
3.5.1	Overview	24
3.5.2	Advantages and Disadvantages of Different Methods of Operation	27
4	ORGANISATIONAL IMPLEMENTATION	29
4.1	Organisational Design	29
4.2	Standardisation	30
4.2.1	What is Standardisation?	30
4.2.2	Standardisation of Processes and Procedures in Terms of Automation and Remote Operation	30
4.2.3	Standardisation of the Work Environment	31
4.2.4	Technical Standardisation	31
4.3	Service Model to Customers	32
4.4	Interaction with the Public	32
5	OPERATIONAL IMPLEMENTATION	33
5.1	Implementation of Remote Operation	33
5.2	Definition of Processes and Procedures	33
5.2.1	Process – Remote Operation	33
5.2.2	Process – Asset Management and Maintenance	34
5.2.3	Graceful Degradation	35
5.3	Operator Skills	36
5.3.1	Workload onto the Operator	36
5.3.2	Operator Tasks	37
	<i>Table 8: Overview of the different possible tasks with both local and remote control operation</i>	37
5.3.3	Training Requirements	37
5.3.3.1	Additional Training Requirements for Remote Control	37
5.3.3.2	Using Remote Control Systems	38

5.3.3.3	Working in a Remote control centre	38
5.3.4	Function Description	38
5.4	Standardisation and Ergonomic Principles	39
5.4.1	Control Room Design	39
5.4.2	Ergonomics of the Operator Desk	40
5.4.3	Visualisation to the Operators	42
5.4.3.1	Human-Machine Interface (HMI)	42
5.4.3.2	Camera Plan	43
5.4.4	Control Room Standardisation in Europe	45
5.4.4.1	Belgium	45
5.4.4.2	Germany	48
5.4.4.3	The Netherlands	49
5.4.5	Control Room Standardisation in the USA	51
5.4.6	Control Room Standardisation in Canada	52
1.1.1.	Operator Cognitive Ergonomic Study	53
6	TECHNICAL IMPLEMENTATION	54
6.1	Legislation and Technical Standards	54
6.1.1	Europe: Route to Compliance with EU Directives	54
6.1.1.1	Background	54
6.1.1.2	Compliance by Adoption of Harmonised Standards	54
6.1.1.3	Compliance by Means other than Adoption of Harmonised Standards	55
6.1.1.4	CE Marking	55
6.1.1.5	Technical File	57
6.1.1.6	Provision of Operation and Maintenance Information	57
6.1.1.7	Competence of Maintenance Engineers	58
6.1.1.8	Data Protection Regulations	58
6.1.2	USA: Standards	58
6.1.3	Canada: Standards	59
6.1.3.1	Canadian Regulations	59
6.1.3.2	Canadian Electrical Standards	59
6.2	System Architecture	59
6.2.1	Introduction	59
6.2.2	System Architecture for Remote Operation	60
6.2.3	Management of System Architecture and Complexity	62
6.3	Technical Developments	63
6.3.1	Instrumentation and Control	63
6.3.1.1	Water Level Measurement Devices	63
Position Detection		64
6.3.1.2	Programmable Logic Controllers (PLC)	65
6.3.1.3	Supervisory Control and Data Acquisition (SCADA)	66
6.3.1.4	Closed Circuit Television System (CCTV-system)	67
6.3.1.5	Communication Technology	69
6.3.2	Data Communication	70
6.3.2.1	Local Area Network (LAN)	70
6.3.2.2	Wide Area Network (WAN)	70
6.3.2.3	Communication Protocols	70
6.3.2.4	Converging Business System Networks with 'Industrial' Control Network Data	71
6.3.3	Automation Systems	71
6.3.3.1	Operator-Decision vs Machine-Decision	71
6.3.3.2	Automation of Water Management	72
6.3.3.3	Automation of Railway Bridges	72
6.3.3.4	Traffic Control	72
6.3.3.5	Detection Systems	74
6.3.3.6	Fully Automatic Operation	74
6.3.3.7	Self-Service for Operation by Vessel Operators	76
6.3.3.8	Vessel Self-Spotting and Self-Positioning	79
6.3.3.9	Hands-Free Mooring	80
6.3.4	Simulator Technology	81
6.3.4.1	AWATAR Simulator in Belgium, Flanders	81
6.3.4.2	Plant Simulation in Germany – PLC Control Application Software Testing	82

6.3.4.3	Simulator in the Netherlands	83
6.3.4.4	Simulator in Belgium, Port of Antwerp	84
7	SAFETY	85
7.1	Introduction	85
7.2	Operational Safety	85
7.2.1	Situational Awareness	85
7.2.2	Responsibilities Relative to the Operation of Barriers	85
7.2.3	Operational Safety Relative to the Mooring Process	85
7.3	Technical Safety Solutions	86
7.3.1	Functional Safety	86
7.3.2	Hierarchy of Risk Reduction	86
7.3.3	Defining Safety Functions	87
7.3.4	Safety Requirements	87
7.3.4.1	Interlocking in the Control System	87
7.3.4.2	Safety Requirements on Video Management	88
7.3.4.3	Failsafe-PLC	89
7.3.4.4	Emergency Stop	89
7.3.5	Redundancy	92
8	SECURITY	93
8.1	Introduction to Security	93
8.2	Perimeter Protection	93
8.3	Cybersecurity	93
8.4	System Hardening	94
8.5	Traffic Monitoring	94
8.5.1	Control of Vessel Traffic	94
8.5.2	Camera Ship Recognition in Case of Collisions	94
8.5.3	Control of Local Road and Pedestrian Traffic	95
9	TRAFFIC MANAGEMENT	96
10	INFORMATION MANAGEMENT	97
10.1	Value of Information	97
10.2	(Big) Data Analysis	97
10.2.1	Data Collection Useful for Traffic Management	97
10.2.2	Water Level Management Data Collection	98
10.2.3	Data Collection Useful for Asset Management	98
10.2.4	Health Monitoring	98
11	FUTURE CONSIDERATIONS	100
11.1	Increase of Data Collection	100
11.2	Vision: Where to go to?	100
