PIANC REPORT N° 201
INLAND NAVIGATION COMMISSION

**FRAMEWORK FOR AN INLAND WATERWAY
CLASSIFICATION IN SOUTH AMERICA**

21 October 2020

PIANC has Technical Commissions concerned with inland waterways and ports (InCom), coastal and ocean waterways (including ports and harbours) (MarCom), environmental aspects (EnviCom) and sport and pleasure navigation (RecCom).

This report has been produced by an international Working Group convened by the Inland Navigation Commission (InCom). Members of the Working Group represent several countries and are acknowledged experts in their profession.

The objective of this report is to provide information and recommendations on good practice. Conformity is not obligatory and engineering judgement should be used in its application, especially in special circumstances. This report should be seen as an expert guidance and state-of-the-art on this particular subject. PIANC disclaims all responsibility in the event that this report should be presented as an official standard.

TABLE OF CONTENTS

PREAMBLE.....	2
1 INTRODUCTION.....	3
1.1 Terms of Reference.....	4
1.2 Related PIANC Reports	4
1.3 Members of the Working Group	5
1.4 Meetings.....	6
1.5 Acknowledgements	6
2 BACKGROUND.....	7
3 Context, Potential Benefits and Objectives of A SOUTH American IW Classification System	8
4 Parameters FOR Classification and Existing Inland Waterways Classifications in South America....	12
4.1 Identification of the Parameters for a S.A. Classification.....	12
4.2 Inland Waterways Classification in Brazil	13
4.3 Inland Waterways Classification in Colombia.....	14
4.4 Other Inland Waterways Classifications in South America.....	15
4.5 Conclusions.....	15
5 FRAMEWORK for AN Inland Waterways Classification in South America	16
5.1 The Main Objectives of a Common South American Classification for Inland Waterways	16
5.2 The General Structure of an Inland Waterway Classification in S.A.....	17
6 Tier One – Classes of Inland Waterways	19
6.1 TIER ONE – SUB-CLASS ‘Variant a’	19
6.2 TIER ONE – SUB-CLASS ‘Variant b’	22
6.3 Conclusion for TIER ONE	24
7 TIER TWO – Service Level.....	26
8 TIER THREE – Regulatory and Management Regime of the INLAND WATERWAYS	27
9 TECHNICAL CONTRIBUTIONS.....	32
9.1 Definition of a Stretch and its Stretch Length.	32
9.2 Waterway Reliability (Water Depth, etc.).....	33
9.3 Low Water Reference Plane (LWRP).....	34
9.4 Responsibility with regard to the Classification	35
9.5 How to Use the IW Classification for Investment and Planning (Traffic)	36
9.6 Parameters Influencing the Navigability and the Classifications of a Waterway.....	37
9.6.1 Minimum Water Depth.....	37
9.6.2 Minimum Width of the Navigation Channel	38
9.6.3 Sedimentation, Geomorphology of the River.....	38
9.6.4 Hydrometric Measurement Network	39
9.6.5 Hydrographic Survey of the Navigable Channel.....	40
9.7 Exceptions to the IW Classification Assigned at a River Stretch	40
9.8 River Stretches Which Require Specific Classifications	41
10 BENCHMARK – CASE STUDIES	42
11 CONCLUSIONS and RECOMMENDATIONS	44
11.1 Recommendations for the Implementation of an IW Classification in South America	45
12 REFERENCES.....	46
APPENDIX: Terms of Reference WG 201.....	47
ANNEXES – CASE STUDIES	50
