## MarCom WG Report n° 185 - 2019

# POR TS ON GREENFIELD SITES – GUIDELINES FOR SITE SELECTION AND MASTERPLANNING

The World Association for Waterborne Transport Infrastructure

**PIANC**  
The World Association for  
Waterborne Transport Infrastructure

**PIANC REPORT N° 185**  
MARITIME NAVIGATION COMMISSION

**POR TS ON GREENFIELD SITES – GUIDELINES  
FOR SITE SELECTION AND MASTERPLANNING**

2019

PIANC has Technical Commissions concerned with inland waterways and ports (InCom), coastal and ocean waterways (including ports and harbours) (MarCom), environmental aspects (EnviCom) and sport and pleasure navigation (RecCom).

This report has been produced by an international Working Group convened by the Maritime Navigation Commission (MarCom). Members of the Working Group represent several countries and are acknowledged experts in their profession.

The objective of this report is to provide information and recommendations on good practice. Conformity is not obligatory and engineering judgement should be used in its application, especially in special circumstances. This report should be seen as an expert guidance and state-of-the-art on this particular subject. PIANC disclaims all responsibility in the event that this report should be presented as an official standard.

# TABLE OF CONTENTS

0	PREFACE.....	1
0.1	Introduction .....	1
0.2	Target Audience.....	1
0.3	Scope.....	2
0.4	Terms of Reference .....	2
0.5	Structure of this Report .....	2
0.6	Related PIANC Reports .....	2
0.7	Members of the Working Group .....	3
0.8	Meetings .....	3
0.9	Acknowledgements .....	4
1	The Site Selection and Masterplanning Process for Greenfield Ports .....	5
1.1	Definitions .....	5
1.1.1	What is a Greenfield Site? .....	5
1.1.2	This Guide Addresses the Site Selection Process. What is Site Selection? .....	5
1.1.3	What is a Port Masterplan?.....	5
1.2	Types of Greenfield Port and Marine Terminal Developments.....	5
1.3	Overview of Site Selection and Masterplanning Process .....	8
1.4	Typical Timeline for Masterplanning and Implementation .....	9
1.5	Detailed Site Selection and Masterplanning Process.....	10
2	Developing the Port Vision and Strategic Plan .....	12
2.1	Sustainability as a Guiding Principle .....	12
2.1.1	Working with Nature (WwN) Philosophy .....	12
2.1.3	Steps from a Port Vision to a Masterplan.....	13
2.2	Developing a Port Vision and Strategy.....	14
2.2.1	Why is a Port Vision Required? .....	14
2.2.2	What is a Port Vision?.....	15
2.2.2.1	Defining Strategic Objectives .....	16
2.2.2.2	Defining Basic Assumptions .....	17
2.2.2.3	Understanding Current Situation, Risks and Opportunities .....	17
2.2.3	Stakeholder Consultation.....	18
2.2.3.1	Early Context.....	19
2.2.3.2	Stakeholder Engagement.....	19
2.2.3.3	Identifying Stakeholders .....	20
2.2.3.4	Stakeholder Consultation Process .....	21
2.2.3.5	Timeframe for the Engagement Process .....	21
2.2.4	Setting a Strategic Plan with a Common Working Agenda .....	21
2.3	Developing a Commercial Plan.....	22
2.3.1	Market Assessment .....	23
2.3.2	Understanding the Complete Logistics Chain .....	23
2.3.2.1	Identifying the Logistics Chain.....	23
2.3.2.2	Logistics Chain Links.....	24
2.3.2.3	Competitor Analysis .....	24
2.3.3	Fleet Analysis.....	25
2.3.4	Traffic Forecasts .....	25
2.3.5	Revenue Forecasts.....	26
2.4	Defining the Scope and Extent of the Port Development .....	26
2.4.1	General .....	26
2.4.2	Levels of Assessment .....	27
2.4.3	National Level .....	27
2.4.3.1	Regional Level.....	27
2.4.3.2	Port Level 27	
2.4.3.3	Terminal Level.....	28
2.4.3.4	Asset Level.....	28
2.4.4	Timeframe Horizons.....	28
2.4.5	Phasing of the Development .....	29
2.4.6	Project Constraints.....	29
2.5	Commissioning the Masterplan .....	31
2.5.1	The Planning Cycle .....	31
3	Setting the Functional and Performance Requirements .....	35
3.1	Setting the Functional Requirements .....	35
3.2	Setting the Operational Performance Requirements.....	36
3.2.1	Design Vessel Definition .....	37
3.2.2	Types/Volumes of Cargo to be Handled .....	38

3.2.3	Facilities Operational Criteria.....	39
3.2.3.1	General Definitions.....	39
3.2.3.2	Berth Availability.....	39
3.2.3.3	Berth Occupancy/Berth Commitment.....	39
3.2.3.4	Downtime 40	
3.2.3.5	Landside Operational Requirements.....	41
3.2.4	Orientation and Proximity.....	41
3.2.5	Storage and Auxiliary Areas .....	41
3.2.6	Hinterland Access.....	42
3.2.7	Future Proofing, Flexibility and Adaptability .....	42
3.3	Setting the Engineering Performance Requirements .....	43
3.3.1	Engineering Criteria .....	43
3.3.2	Constructability Considerations.....	43
3.3.3	Utility Provisions.....	44
3.4	Establishing the Land Requirements and Limitations .....	44
4	Outlining the Spatial Needs .....	47
4.1	Introduction .....	47
4.2	Marine Areas and Depth .....	48
4.2.1	Overview .....	48
4.2.2	Vessels to be Accommodated (Design Vessels).....	49
4.2.3	Approach Channel Horizontal Alignment .....	49
4.2.4	Channel Depth .....	50
4.2.5	Channel Width .....	51
4.2.6	Quay/Berth Depth .....	52
4.2.7	Anchorage Areas .....	52
4.2.8	Harbour Entrance, Berthing and Manoeuvring Areas .....	53
4.2.9	Clearance for Passing Vessels .....	54
4.2.10	Port Basins, Piers and Berthing Areas.....	55
4.2.11	Small Craft Harbour Area.....	57
4.2.12	Construction or Marine Offloading Facility (MOF) .....	57
4.2.13	Summary of Marine Area Requirements .....	57
4.3	Requirements for Providing Shelter and Avoiding Resonance.....	58
4.3.1	Operational Environmental Limitations .....	59
4.3.2	Limit State Environmental Limitations .....	60
4.3.3	Harbour Basin Resonance .....	61
4.3.4	Effects of Winter Navigation on Channel Design .....	62
4.4	Land Areas.....	62
4.4.1	General .....	62
4.4.2	Quay Lengths and Apron Widths .....	62
4.4.3	Storage Area.....	63
4.4.3.1	General Formula .....	63
4.4.3.2	General Cargo Terminals .....	63
4.4.3.3	Dry Bulk Terminals .....	64
4.4.3.4	Liquid Bulk Terminals .....	64
4.4.3.5	Container Terminals .....	66
4.5	Land Access Requirements .....	66
4.5.1	Roads .....	66
4.5.2	Rail.....	67
4.5.3	Inland Waterways .....	67
4.5.4	Pipeline and Conveyor Systems .....	67
4.6	Construction Needs.....	68
4.7	Environmental Provisions.....	68
5	Identification and Characterisation of Potential Sites.....	71
5.1	Introduction .....	71
5.1.1	Importance of Site Identification and Characterisation.....	71
5.1.2	Context within the Screening Process .....	71
5.2	First-Level Site Characteristics .....	73
5.2.1	Context .....	73
5.2.2	Type of Port Location (Baseline Conditions and Sheltering).....	73
5.2.3	Access to Deep Water .....	74
5.2.4	Need for Breakwaters for Coastal Ports.....	74
5.2.5	Capital and Maintenance Dredging .....	75
5.2.6	Exposure to Extreme Conditions and Events.....	76
5.2.7	Environmental Value Identification .....	76
5.2.8	Existing Land Use and Infrastructure .....	76
5.3	Detailed Site Characteristics .....	76

	5.3.1 Existing Physical Conditions .....	76
	5.3.1.1 Bathymetry .....	76
	5.3.1.2 Topography .....	77
	5.3.1.3 Geology 77	
	5.3.1.4 Geotechnical/Geophysics and Contaminant.....	77
	5.3.1.5 Seismicity 78	
	5.3.1.6 Materials Sourcing and Disposal Studies .....	78
	5.3.1.7 Waves and Metocean Aspects (Including Wave Disturbance and Resonance) .....	78
	5.3.1.8 Water levels.....	78
	5.3.1.9 Currents 78	
	5.3.1.10 Wind 79	
	5.3.1.11 Extreme Events (Hurricanes/Cyclones/Typhoons and Tsunamis).....	79
	5.3.1.12 Other Meteorological Parameters (Fog, Rain, Snow, Ice) .....	79
	5.3.1.13 Geomorphology, Sedimentation, Sediment Transport and Coastal Impacts .....	79
	5.3.2 Existing Ecological/Environmental Conditions .....	80
	5.3.2.1 Baseline Environmental Conditions.....	80
	5.3.3 Existing Social Conditions.....	81
	5.3.4 Existing Land Use Designations and Planning Restrictions.....	81
	5.3.5 Existing Infrastructure .....	81
	5.4 Data Collection, Inspection, Investigation and Survey: When and Where to Get It.....	82
6	Evaluating and Screening Potential Options.....	85
	6.1 Introduction .....	85
	6.2 The Evaluation Process .....	85
	6.2.1 Establish Scope and Objectives of Assessment .....	85
	6.2.2 Define the Level of Assessment.....	86
	6.2.3 Consider Alternative Evaluation Techniques .....	86
	6.2.4 Establish the Critical Input Data .....	88
	6.2.5 Basis of Assessment.....	88
	6.3 Multi-Criteria Analysis .....	89
	6.3.1 General.....	89
	6.3.2 Participants .....	89
	6.3.3 Evaluation Process .....	90
	6.3.3.1 The Process of Identifying Criteria .....	90
	6.3.3.2 Gate 1 Criteria: Long List to Shorter List that Meets Minimum Requirements .....	93
	6.3.3.3 Gate 2 Criteria: Refine to Preferred Options.....	93
	6.3.4 Weighting Criteria .....	94
	6.3.4.1 Subjective 94	
	6.3.4.2 Pairwise Comparison .....	94
	6.3.4.3 Swing Weightings .....	96
	6.3.4.5 Option Scoring Methods .....	96
	6.3.5.1 Basis of Scores .....	96
	6.3.5.2 General 97	
	6.3.5.3 Use of Financial and Economic Criteria .....	97
	6.3.5.4 Evaluation of Ecosystem Services .....	98
	6.3.5.5 Discounting.....	101
	6.3.5.6 Evaluation of Subjective Criteria.....	101
	6.3.5.7 Range of Scores.....	101
	6.3.5.8 Dominance and Duplication.....	103
	6.3.6 Option Evaluation and Preferred Option Selection.....	105
	6.4 Risk Assessment.....	106
	6.4.1 Determine Level of Risk.....	106
	6.4.2 Risk Analysis and Mitigation .....	108
	6.5 Defining and Optimising the Preferred Option.....	108
7	Planning the Management, Permitting and Procurement .....	109
	7.1 Institutional Management.....	109
	7.2 Financing .....	110
	7.3 Permits, Consents and Approvals.....	110
	7.4 Land Acquisition.....	110
	7.5 Procurement of Infrastructure .....	111
	7.5.1 General.....	111
	7.5.2 Client-Led (Traditional) .....	111
	7.5.3 Contractor-Led .....	111
	7.5.4 Dredging .....	112
	7.6 Implementation Process.....	112
	7.6.1 General .....	112
	7.6.2 Risk Reduction.....	112

7.6.3	Outline Design .....	112
7.6.4	Developed and Detailed Design.....	113
7.6.5	Construction.....	113
References .....		118

## LIST OF FIGURES

Figure 0.1	This publication covers the planning of traditional harbours and terminals (front cover) as well as exposed jetties and berths as illustrated above .....	4
Figure 1.1	High-level masterplanning process for greenfield ports .....	8
Figure 1.2	Screening process – Qualitative and increasing level of detail .....	9
Figure 1.3	Indicative timelines for a simple terminal development at a greenfield location and a major new port development .....	10
Figure 1.4	Detailed masterplanning process.....	11
Figure 2.1	Step 1 – Identifying the needs and vision .....	12
Figure 2.2	From a Port Vision (Strategic Planning) to a Masterplan (Technical Planning enclosed by red dashed line).....	13
Figure 2.3	Growth-of-the-port by creating added value for business, clients and stakeholders on a proactive approach and based on Strategic Stakeholder Management (Port of Rotterdam, 2014) .....	14
Figure 2.4	Possible sections for a Port Vision.....	15
Figure 2.5	General structure for a Strategic Plan.....	22
Figure 3.1	Step 2 – Setting the functional and performance requirements .....	35
Figure 4.1	Step 3 – Outlining the spatial needs .....	47
Figure 4.2	Key spatial needs .....	47
Figure 4.3	Channel depth factors for concept design .....	51
Figure 4.4.	Anchorage area schematic [PIANC WG 121, 2014] .....	53
Figure 4.5	Stopping procedure and channel dimensions [PIANC WG 121, 2014] .....	53
Figure 4.6.	Schematic of basin width [Ligteringen, 2012].....	55
Figure 4.7	Indicative planning of finger piers [Thoresen, 2018] .....	56
Figure 4.8.	Dredged area around a berth (based on Thoresen (2018)) .....	57
Figure 4.9	Providing shelter .....	59
Figure 4.10	Indicative schematic for the quay length [Thoresen, 2018].....	63
Figure 5.1	Step 4 – Identification and characterisation of potential sites.....	71
Figure 5.2	Illustration of coastal impact.....	75
Figure 5.3	Hierarchy of data uses .....	82
Figure 6.1	Step 5 – Evaluating and screening potential options .....	85
Figure 6.2	The MCA Process.....	91
Figure 6.3	Port masterplanning values tree (i.e. MCA criteria and inputs) .....	92
Figure 6.4	Example of a multi-criteria analysis for a port project .....	100
Figure 7.1	Step 6 – Planning the management, permitting and procurement .....	109

## LIST OF TABLES

Table 0.1	Target audience .....	1
Table 0.2	Relevant PIANC reports.....	3
Table 0.3	Members of PIANC WG 185.....	3
Table 1.1	Application of Working Group publication WG 158 and this publication WG 185 .....	7
Table 1.2	Integrating WG 158 and WG 185.....	7
Table 2.1	Understanding the key issues, risks and opportunities .....	18
Table 2.2	Benefits of stakeholder engagement .....	20
Table 2.3	Typical project constraints (for Type 1 ports see WG 158) .....	30
Table 3.1	Typical necessity for different functionalities according to the purpose of development .....	36
Table 3.2	Orientation and proximity requirements for most common terminal types .....	41
Table 4.1	Typical dimensions of required marine areas (for initial planning only).....	58
Table 4.2	Limiting environmental operating conditions .....	60
Table 4.3	Approximate bulk storage requirements. (Source: Agerschou).....	64
Table 4.4	Minimum separation distances for small tanks. (Source: HSG 176).....	65
Table 4.5	Minimum separation distance for large tanks. (Source: HSG 176) .....	65
Table 5.1	Summary list of parameters related to site characterisation .....	84
Table 6.1	Alternative evaluation techniques .....	87
Table 6.2	Recommended typical option evaluation process.....	88
Table 6.3	Example of pairwise comparison count distribution .....	95

Table 6.4	Example of cost benefit analysis.....	98
Table 6.5	Example of nonlinear scoring.....	101
Table 6.6	Example likelihood quantification.....	106
Table 6.7	Example consequence quantification .....	107
Table 6.8	Assessment of risks.....	108

## LIST OF APPENDICES
