Management of aquatic disposal of dredged material

PIE

Report of Working Group I
(1998)

INTERNATIONAL NAVIGATION ASSOCIATION

- 1. Introduction**
 - 1.1. Description of the Task
 - 1.2. Scope and Use of the Report
 - 1.3. Some Definitions and Abbreviations
- 2. Management Framework**
 - 2.1. General Approach
 - 2.2. Management
- 3. Dredged Material and Site Characterisation**
 - 3.1. Survey and Sampling Methods
 - 3.1.1. Survey
 - 3.1.2. Sampling Plan
 - 3.2. Dredged Material Characterisation
 - 3.2.1. Physical Sediment Characterisation
 - 3.2.2. Chemical Characterisation of the Sediments to be Dredged
 - 3.2.3. Ecotoxicological Characterisation
 - 3.2.4. Biological Sediment Characterisation

- 3.3. Characterisation of the Disposal Site
 - 3.3.1. Physical Site Characterisation
 - 3.3.2. Chemical Site Characterisation
 - 3.3.3. Biological Site Characterisation
 - 3.3.4. Functional Uses of the Receiving Area
- 4. Effects of Disposal**
 - 4.1. Physical Processes
 - 4.1.1. Physical Processes during Disposal
 - 4.1.2. Long Term Processes after Disposal
 - 4.2. Physical Effects on the Ecology
 - 4.2.1. Turbidity Related Effects
 - 4.2.2. Effects due to Changes in Suspended Solids Concentration
 - 4.2.3. Effects Related to Changes in Sedimentation Rate and Burial
 - 4.3. Chemical and Ecotoxicological Effects
 - 4.3.1. Chemical Effects
 - 4.3.2. Biological Impacts due to Contamination of the Dredged Material
 - 4.4. Effects on Functional Use of the Waterbody and Other Amenities
- 5. International, Regional and National Environmental Controls**
 - 5.1. Philosophies and General Approaches
 - 5.2. Marine and Estuarine Disposal
 - 5.2.1. International and Regional Conventions
 - 5.2.2. The London Convention 1972 (LC)
 - 5.3. Inland Waterways Disposal
 - 5.3.1. Differences Compared to Sea Disposal
 - 5.3.2. Definition of Waste
- 6. Planning and Engineering for Aquatic Disposal**
 - 6.1. Regulatory Decision Framework
 - 6.1.1. Conception of Decision Framework
 - 6.1.2. Dredged Material Assessment Framework
 - 6.1.3. Players in the Field
 - 6.1.4. Public Involvement
 - 6.1.5. Environmental Impact Statement
 - 6.1.6. Permit Application
 - 6.2. Technical Decision Framework
 - 6.2.1. Definition of Problem
 - 6.2.2. Decision to Dredge
 - 6.2.3. Selection of Solutions
 - 6.2.4. Environmental Impact Assessment
 - 6.3. Project Decision Framework
 - 6.3.1. Implementation Decision
 - 6.3.2. Management Requirements
- 7. Operational Aspects of Aquatic Disposal**
 - 7.1. Operations Plan
 - 7.1.1. Dispersive versus Non Dispersive Disposal Sites
 - 7.1.2. Special Site Preparation
 - 7.1.3. Selection of Dredging Equipment
 - 7.1.4. Placement Techniques
 - 7.1.5. Mitigative Measures
 - 7.2. Monitoring Requirements
 - 7.2.1. Types of Monitoring
 - 7.2.2. Monitoring Plans
 - 7.2.3. Data Management and Reporting
- 8. Concluding Remarks and Recommendations**
 - 8.1. Conclusions
 - 8.2. Recommendations
