## Site investigation requirements for dredging works

PTC II

Report of Working Group 23  
Supplement to Bulletin n°103 (2009)

INTERNATIONAL NAVIGATION ASSOCIATION

- 1. INTRODUCTION**
- 2. CONTRACTUAL CONSIDERATIONS**
  - 2.1 Responsibility for Data
  - 2.2 Employer and Contractor Objectives
  - 2.3 Choice of Contract Policy
  - 2.4 FIDIC Form of Contract
  - 2.5 Employer Awareness
- 3. OBJECTIVES AND GENERAL REQUIREMENTS OF SITE INVESTIGATIONS**
  - 3.1 General Objectives
  - 3.2 Bathymetric Surveys
  - 3.3 Geological and Geotechnical Investigations
    - 3.3.1 Objectives
    - 3.3.2 Ground Conditions and Dredging Costs
    - 3.3.3 Area to be investigated

- 3.3.4 The Marine Environment
- 3.3.5 The Use of the Data
- 3.3.6 The Dredging Process and the Influence of Soil and Rock Properties
- 3.3.7 Types of Soil and Rock
- 3.4 Environmental Conditions
  - 3.4.1 General Objectives
  - 3.4.2 Hydraulic Data
  - 3.4.3 Sediment Transport Data
  - 3.4.4 Meteorological Data
- 3.5 Other Investigations
- 4. IMPLEMENTATION OF INVESTIGATIONS**
  - 4.1 Management of Investigations
    - 4.1.1 Method of Procurement
    - 4.1.2 Communication and Understanding of Objectives
    - 4.1.3 Flexibility of Approach
  - 4.2 Staffing
    - 4.2.1 Use of Appropriately Qualified Staff
    - 4.2.2 Continuity of Staffing
  - 4.3 Standards and Quality Assurance
- 5. BATHYMETRIC SURVEYS**
  - 5.1 Depth Measurement
    - 5.1.1 Methods of Measurement
    - 5.1.2 Required Accuracy
    - 5.1.3 Calibration of Echo sounders
    - 5.1.4 Echo Sounding Frequencies
    - 5.1.5 Beam Width
    - 5.1.6 Sea Conditions
    - 5.1.7 Speed of Survey Vessel
    - 5.1.8 Density of Soundings
    - 5.1.9 Orientation and Extent of Sounding Lines
  - 5.2 Horizontal Positioning
    - 5.2.1 Traditional Optical Systems
    - 5.2.2 New Optical Positioning Systems
    - 5.2.3 Radio Positioning Systems
    - 5.2.4 Differential Global Positioning System
  - 5.3 Water Level
  - 5.4 Data Processing and Presentation
  - 5.5 Other Related Investigations
    - 5.5.1 Sonar Investigation
    - 5.5.2 Magnetometer Survey
- 6. GEOLOGICAL AND GEOTECHNICAL INVESTIGATIONS**
  - 6.1 Geological Data Requirements
  - 6.2 Geotechnical Data Requirements
  - 6.3 Ground Investigation Design
    - 6.3.1 Desk Study
    - 6.3.2 Preliminary Investigation
    - 6.3.3 Detailed Investigation
    - 6.3.4 Laboratory Testing
    - 6.3.5 Analysis and Reporting of Results
  - 6.4 Field Methods of Ground Investigation
    - 6.4.1 General Approach
    - 6.4.2 Direct Methods
    - 6.4.3 Indirect Methods
    - 6.4.4 In Situ Tests
  - 6.5 Laboratory Testing
  - 6.6 Soil and Rock Description
  - 6.7 Intensity of Investigation
  - 6.8 Reports and Data Presentation
- 7. ENVIRONMENTAL CONDITIONS**
  - 7.1 Hydraulic Data
    - 7.1.1 Waves
    - 7.1.2 Water-levels
    - 7.1.3 Current Velocities
  - 7.2 Sediment Transport
  - 7.3 Meteorological Data
    - 7.3.1 General Description of the Weather System
    - 7.3.2 Wind
    - 7.3.3 Precipitation

- 7.3.4 Reduced Visibility/Fog
- 7.3.5 Air Temperature and Humidity
- 7.3.6 Ice conditions

**8. OTHER ASPECTS**

- 8.1 Site Access and Obstructions
- 8.2 Other Marine Traffic
- 8.3 National and Local Laws
- 8.4 Harbour Regulations
- 8.5 Navigation Marks
- 8.6 Local Support Services
- 8.7 Safety

**BIBLIOGRAPHY**
