Breakwaters with Vertical and Inclined Concrete Walls

MarCom
Report of WG 28
2003

INTERNATIONAL NAVIGATION ASSOCIATION

- 1. INTRODUCTION**
 - 1.1 Working Group 28
 - 1.2 Terms of reference and organisation of work
 - 1.3 Summary of work
- 2. TYPES OF STRUCTURES**
 - 2.1 Conventional types
 - 2.2 New concepts
- 3. OVERVIEW OF FAILURE MODES**
 - 3.1 Terms of failure
 - 3.2 Types of failure modes
- 4. HYDRAULIC RESPONSE**
 - 4.1 Overtopping
 - 4.2 Wave reflection
 - 4.3 Wave Transmission

- 5. WAVE FORCES**
- 5.1 Introduction
- 5.2 Practical formulae for 2-D wave on vertical walls
- 5.3 Effect of structure length and alignment
- 6. OTHER FORCES**
- 6.1 Earthquake
- 6.2 Ice Pressure
- 6.3 Earth Pressures for Structural Design
- 6.4 Fill Pressures within Caissons
- 6.5 Friction
- 6.6 Handling and Float-Out Loads
- 6.7 First Grounding
- 7. DESIGN METHODS**
- 7.1 Present design practice
- 7.2 Partial safety factor system
- 8. PERFORMANCE OF EXISTING STRUCTURES**
- 8.1 Objectives and Methodology
- 8.2 Cases investigated
- 8.3 Selected Case Summaries
- 8.4 Summary and Conclusions
- 8.4.1 Summary
- 8.4.2 Conclusions
- 9. MATERIALS, CONSTRUCTION AND MAINTENANCE**
- 9.1 Concrete
- 9.1.1 General Principles
- 9.1.2 Design Working Life (or service Life)
- 9.1.3 Process of Deterioration
- 9.1.4 Exposure Classification
- 9.1.5 Influence of Cement Type
- 9.1.6 Influence of Cement Content
- 9.1.7 The Influence of Cracking
- 9.1.8 Influence of Curing
- 9.1.9 Monitoring and Maintenance
- 9.2 Materials
- 9.2.1 Rock and Rubble
- 9.2.2 Filling and Backfilling
- 9.2.3 Unreinforced Concrete
- 9.2.4 Reinforced Concrete, including the selection of Cover to Reinforcement
- 9.2.5 Protective Measures such as Coatings and Cathodic Protection
- 9.2.6 Corrosion of Structural Steel
- 9.3 Construction Related Criteria and Methods for Caissons
- 9.3.1 Sea Conditions Data and Limits for Construction Risks
- 9.3.2 Construction Joints
- 10. RECOMMENDATIONS**
- 10.1 Design codes and design procedures
- 10.2 Overtopping
- 10.3 Slip failure calculations
- 10.4 Structural, material and construction aspects
- 10.4.1 Structural Analysis and Change to Probabilistic Approach
- 10.4.2 Earth Pressure Analysis for the Design of Structural Elements
- 10.4.3 Concrete Durability
