Guidelines for Managing Wake Wash from High-Speed Vessels

MarCom
Report of WG 41
2003

INTERNATIONAL NAVIGATION ASSOCIATION

1. **Introduction**
 - 1.1 Summary
 - 1.2 Method of undertaking the task
 - 1.3 Definition of high-speed vessel
2. **International experience with high-speed vessel wake**
3. **Wave generation and vessel wake**
 - 3.1 Introduction
 - 3.2 Wave generation and wake characteristics
 - 3.2.1 Conventional wake patterns-sub-critical wash
 - 3.2.2 Near-critical wash
 - 3.2.3 Super-critical wave pattern
 - 3.2.4 General mechanisms
 - 3.3 Propagation and transformation of high-speed vessel wake
 - 3.3.1 Direction of wave propagation

- 3.3.2 Composition of wash and its frequency components
- 3.3.3 Wave transformation and wave decay
- 3.4 Wake in coastal areas
 - 3.4.1 General wave transformation
 - 3.4.2 Propagation of vessel wake in coastal zone
- 3.5 Wake generated by non-steady operation
 - 3.5.1 Acceleration, deceleration, and extent of wash
 - 3.5.2 Change of wake regime with constant speed
 - 3.5.3 Focusing the wash during course changes
 - 3.5.4 Impact of bathymetry on operational procedures
- 3.6 Bernoulli wake and soliton waves
- 3.7 Wake prediction, analysis, and assessment
 - 3.7.1 Numerical prediction of wake
 - 3.7.2 Full-scale trials and measurements
 - 3.7.3 Model scale trials
 - 3.7.4 Wake analysis
 - 3.7.5 Wake assessment
- 4. Impacts associated with vessel wake**
 - 4.1 Overview
 - 4.2 Safety impacts
 - 4.2.1 Safety of people
 - 4.2.2 Safety of vessels
 - 4.2.3 Structural damage
 - 4.3 Environmental impact of wake
 - 4.3.1 Overview
 - 4.3.2 Potential impacts
 - 4.3.3 Differentiating between causes
 - 4.3.4 Predicting environmental impact
- 5. Managing vessel wake**
 - 5.1 Introduction
 - 5.2 Management measures
 - 5.2.1 Vessel design
 - 5.2.2 Operational measures
 - 5.2.3 Non-operational measures
 - 5.3 Route assessment
 - 5.3.1 Overview
 - 5.3.2 Route characterization
 - 5.3.3 Impact identification
 - 5.3.4 Developing and assessing potential management measures
 - 5.3.5 Monitoring
- 6. Conclusion**
