# Keynotes

**25 years of fixing bridges on gravel mined rivers in California**  
C.M.C. Avila

**Scour and sedimentation of submarine pipelines: Closing the gap between laboratory experiments and field conditions**  
S. Draper, L. Cheng & D.J. White

**Hydrodynamics of sediment transport: Grain scale to continuum scale**  
S. Dey & Sk.Z. Ali

**Lessons on internal erosion in embankment dams from failures and physical models**  
J.J. Fry

# Advanced numerical modelling of scour and erosion

**Numerical simulation on local scour below a weir using Two-phase WC-SPH method**  
A.M. Abdelrazek, I. Kimura & Y. Shimizu

**3D Numerical modelling of pile scour with free surface profile under waves and current using the level set method in model REEF3D**  
N. Ahmad, H. Bihs, A. Kamath & Ø.A. Arntsen

**Micro-scale characterization of fluid flow in a uniform particle pack using coupled discrete element-lattice Boltzmann method**  
M. Aminpour, S.A. Galindo-Torres, A. Scheuermann & L. Li

**Using DEM to assess the influence of stress and fabric inhomogeneity and anisotropy on susceptibility to suffusion**  
K. Kawano, C. O'Sullivan & T. Shire

**Numerical simulation of scour infilling in overset grid**  
H. Kim, H.C. Chen & J.-L. Briaud

**Numerical simulation of scour below pipelines using flexible mesh methods**  
J.M. Nunez Rattia, J.R. Percival, B. Yeager, S. Neethling & M.D. Piggott

**Simulation of sand particle transport by coupled CFD-DEM: First investigations**  
D. Plenker & J. Grabe

**Development and verification of a finite volume model for hydraulics over multi-layered erodible beds**  
T. Rowan & M. Seaid

**Phenomenological interpretation of internal erosion in granular soils from a discrete fluid-solid numerical model**  
L. Sibille, D. Marot, P. Poullain & F. Lominé

**Numerical modeling of particle migration in granular soils**  
I.G. Tejada, L. Sibille, B. Chareyre & E. Vincens

**Numerical investigation of the particle skeleton of widely graded soils prone to suffusion**  
P. Winkler, H. Jentsch, M.R. Salehi Sadaghiani & K.J. Witt

# Coastal and offshore scour and erosion

**Effect of vibration on the scour process around cylindrical structures under unidirectional flow in a sandy bed**  
M. Al-Hammadi & R.R. Simons

**Sediment transport and shoreline erosion induced by bichromatic waves with varying group period**  
J.M. Alsina, J. van der Zanden, J.S. Ribberink & I. Cáceres

**Characteristics of scour and flow field beneath a forced vibrating circular cylinder**  
Y.-M. Chiew, S.-C. Hsieh & Y.M. Low

**Self-burial of objects on sandy beds by scour: A synthesis of observations**  
C.T. Friedrichs, S.E. Rennie & A. Brandt

**Investigation of scour onset under seabed pipelines with geometric irregularities**  
T. Griffiths, S. Draper, W. Sun, D. White, L. Cheng & H. An

**Exploring the bifurcation between sedimentation versus scour onset below pipelines in unidirectional currents**  
T. Griffiths, S. Draper, W. Sun, D. White, L. Cheng & H. An

**Local scour and flow characteristics around a circular cylinder undergoing vortex-induced vibration**  
S.-C. Hsieh, Y.-M. Chiew, M.-X. Wei & Y.M. Low

**A full scale propeller wash erosion test on heterogeneous cohesive material**  
Y. Karelle, P. Sharpe, G.M. Pizzo, P. Haerens & V. Albanese

**Laboratory experiments on scour around flat circular buckets for high waves and strong current at Wido Windfarm, Westsouth Sea, Korea**  
H. Kim, I. Kim, S. Lee & T. Hong

**Sandwaves and megaripples at Race Bank (UK) offshore windfarm**  
S.M. Larsen, A. Roulund, A.J. Brooks & A. Chaffey

**Time scales for scour below pipelines and around vertical piles due to nonlinear random waves**  
D. Myrhaug, M.C. Ong & S. Dyrseth

**Determination of optimum wave reflection of seawalls via experimental modeling**  
K. Nassar & A.M. Negm

**Scour below marine pipelines due to random waves on mild slopes**  
M.C. Ong, P. Fu & D. Myrhaug

**Seabed preparation design and construction for the Malampaya phase 3 depletion compression platform**  
J. Opkar, L. Lorenti & A. Grime

*continued on the next page*

# Coastal and offshore scour and erosion – *Continued*

**Thermomechanical erosion modelling of Baydaratskaya Bay, Russia with COSMOS**  
S.G. Pearson, R. Lubbad, T.M.H. Le & R.B. Nairn

**Numerical study of local scour effects on the lateral pile-soil interaction**  
W.-G. Qi & F.-P. Gao

**Scour protection design in highly morphodynamic environments**  
H.J. Riezebos, T.C. Raaijmakers, A. Tönnies-Lohmann, S. Waßmuth & P.W. van Steijn

**Parametric equations for Shields parameter and wave orbital velocity in combined current and irregular waves**  
A. Roulund, J. Sutherland, D. Todd & J. Sterner

**Effect of bottom roughness on sediment transport due to streaming beneath linear propagating waves with an angle of attack on current**  
M. Saud Afzal, L.E. Holmedal & D. Myrhaug

**The influence of physical cohesion on scour around a monopile**  
R.J. Schindler, S. Stripling, R.J.S. Whitehouse & J.M. Harris

**Scour properties of mono bucket foundation**  
I.-E. Stroescu & P. Frigaard

**Model experiments and simulations on influence of liquefaction on scour at a landward toe of coastal dykes due to tsunami overflow**  
N. Takegawa, Y. Sawada, K. Murai & T. Kawabata

**Impact of the 2011 tsunami on the littoral system around offshore breakwaters on Sendai Coast**  
H. Tanaka, Y. Mitobe & A. Mori

**Scour development around structures with non-uniform cylindrical geometries**  
N.S. Tavouktoglou, J.M. Harris, R.R. Simons & R.J.S. Whitehouse

**The stability of a block mattress in a propeller induced jet**  
G. van Velzen, M.P.C. de Jong, J.P. Quataert & H.J. Verheij

**Propagation modes of 3D scour below a submarine pipeline in oblique steady currents and waves**  
Z.P. Zang, G. Tang & L. Cheng

**Local scour around two subsea pipelines in an oscillatory flow**  
M. Zhao, M. Liu, L. Lu, L. Cheng, H. An & S. Draper

**Scour patterns below pipelines and scour hole expansion rate**  
Y. Zhu, L. Xie & X. Liang

# Internal erosion

**A discrete numerical description of the mechanical response of soils subjected to degradation by suffusion**  
R. Aboul Hosn, L. Sibille, N. Benahmed & B. Chareyre

**Modeling of particles migration in porous media: Application to soil suffusion**  
C. Ahmed & B. Ahmed

**Assessing the efficiency of filters protecting base soil subject to erosion**  
S. Azirou, A. Benamar & A. Tahakourt

**Hydraulic failure by heave and piping**  
J. Garai

**Characterisation of flow conditions for contact erosion analysis using PIV**  
H.M.D. Harshani, S.A. Galindo-Torres & A. Scheuermann

**Experimental identification of the dominant fabric in widely graded soils**  
H. Jentsch, P. Winkler, M.R. Salehi Sadaghiani & K.J. Witt

**Physical modelling of backward erosion piping in foundation beneath levee**  
N. Koito, K. Horikoshi & A. Takahashi

**Suffusion susceptibility characterization by triaxial erodimeter and statistical analysis**  
V.T. Le, D. Marot, A. Rochim, F. Bendahmane & H.H. Nguyen

**Impact of soil treatment on internal erosion resistance and hydro-mechanical characteristics of a silty soil**  
A. Mehenni, O. Cuisinier, F. Masrouri & E. Lavallée

**Experimental and numerical investigation of backward erosion piping in heterogeneous sands**  
G. Negrinelli, V.M. van Beek & R. Ranzi

**Localized fluidization in a granular medium: Parametric study with a physical model of “sand boiling”**  
P. Philippe, P. Cuéllar, L.-H. Luu, S. Mena & J.S. Curtis

**Laboratory investigation of backward erosion piping—effects of inclined exit face and constricted seepage exits**  
J.D. Rice, I.A. Ibrahim, R.A. Keizer Jr. & R.A. Jaeger

**A possible characterization of suffusion susceptibility independent of the hydraulic loading history?**  
A. Rochim, D. Marot, L. Sibille & V.T. Le

**Experimental findings of soil particle movement in 2D seepage failure of soil using particle image velocimetry**  
T. Tanaka, S. Sannabe, S. Nagai, K. Kasamatsu & K. Inoue

**Interpreting filtration-based suffusion criteria using micro-computed tomography and laboratory filter tests**  
H.F. Taylor, C. O'Sullivan & W.W. Sim

# Management of scour/erosion and sediment (including hazard management and sedimentation in dams and reservoirs)

**Alleviation of the scouring problem downstream of dam spillways through a reversed cross-jet flow dissipator**  
A.D.A. Alghwail

**Detecting scour and liquefaction using OBS sensors**  
H. An, L. Cheng, M. Zhao, G. Tang & S. Draper

**Lime treated soil erodibility investigated by EFA erosion testing**  
A. Bennabi, G. Herrier & D. Lesueur

**Simplified comprehensive scour model compared to erodibility index method**  
E. Bollaert

**Rock scour in Australia: Some latest Queensland experiences**  
E. Bollaert, E. Lesleighter, S. McComber, P. Bozorgmehr, L. Fahey & D. Scriven

**Scour potential at Laouzas Dam**  
E. Bollaert, F. Morel, B. Blancher & P. Lucquiaud

**The borehole erosion test**  
J.-L. Briaud, M. Chedid & A. Shidlovskaya

**Research to improve the applicability of ICOLD Bulletin 164 on internal erosion**  
R. Bridle

**Assessing the risks associated with internal erosion phenomena in aging embankment dams: A New Zealand perspective**  
K.A. Crawford-Flett & J.J.M. Haskell

**CARDigues: An integrated tool for levee system diagnosis and assessment**  
E. Durand, J. Maurin, B. Bridoux & A. Boulay

**Lime treatment of slightly clayey coarse soil for the control of internal erosion by suffusion**  
R. Elandaloussi, A. Bennabi, J.-C. Dupla, J. Canou, A. Benamar & P. Gotteland

**The human factor in an effective structure management system**  
S. Hand, L. Caldwell & J. Scannell

**Surface erosion countermeasures incorporating geotextiles**  
M. Heibaum

**Effects of transitions and objects on the erodibility of grass revetments on dikes**  
G. Hoffmans, D. Stuparu, A. van Hoven & A. Labrujere

*continued on the next page*

# Management of scour/erosion and sediment (including hazard management and sedimentation in dams and reservoirs) – *Continued*

**Hydraulic study on scouring downstream of Funagira Dam spillway apron (Japan)**  
Y. Kitamura & S. Takagi

**Overflow erosion on mixed kaolin-sand embankments**  
F. Lachaussée, D. Pham Van Bang, V. Vidal, C. Chevalier, O. Ndoye, F. Szymkiewicz, C. Minatchy, F. Martineau & K. Watanabe

**Dikes reinforced by deep mixing techniques—long term properties**  
A. Le Kouby, C. Chevalier & L. Saussaye

**Investigation of sediment accumulation in Nubia Lake, using RS/GIS**  
A.M. Negm & M.A. Elsahabi

**Towards quantifying rate of scour using the erodibility index method: Case study**  
A.J. Rock, G.W. Annandale & J.D. Higgins

**Induced shear stress measurement in overtopped floodwalls**  
P. Safarian Bahri, A. Osouli, D. Molohon & F. Lagunas

**Prediction of scour in overtapped floodwalls using JET and EFA**  
P. Safarian Bahri, A. Osouli & E. Stendback

**Influence of uncertainties in internal erosion assessments of existing embankment dams**  
M. Smith

**Application of wireless tracer GPRS riverbed scour monitoring for disaster warning**  
C.C. Su & H.C. Yang

**Continuous grid monitoring to optimize sedimentation management**  
T. Van Hoestenberghe, R. Vanthillo, P. Heidinger, J. Dornstädter, N. Dezillie & N. Van Ransbeeck

# River and estuarine erosion including scour around structures

**Mutual interference of bridge piers placed in staggered arrangement on scour depth**  
M. Beg

**Estimation of scour for bridges in Illinois**  
R. Chaulagai, P. Safarian Bahri & A. Osouli

**Prototype measuring of erosion and currents under the keel of a sailing ship in a canal**  
K. Dorst, D.J. Meys, M. Schroevers & H.J. Verheij

**Hydrodynamic effects of debris blockage and scour on masonry bridges: Towards experimental modelling**  
M. Ebrahimi, P. Kripakaran, S. Djordjević, G. Tabor, R. Kahraman, D.M. Prodanović & S. Arthur

**Screening methodology for bank erosion estimation at pipeline watercourse crossings**  
G. Ferris & S. Newton

**Experimental study of scour around a complex pier with elliptical pile-cap**  
P. Gautam, T.I. Eldho & M.R. Behera

**Bridge scour protection**  
M. Hawkswood & M. King

**A simple method for estimating flood discharge in gravel-bed channels with varied riverbed level**  
J.-H. Hong, W.-D. Guo, H.-W. Wang & P.-H. Yeh

**A case of severe channel-morphology change due to human influences in the Touqian River, Taiwan**  
M.-W. Huang, K.-W. Li, J.-J. Liao, Y.-W. Pan & D.-H. Lee

**Shallow foundations for the support of vertical-wall bridge abutments: Interaction between riprap and contraction scour**  
C. Huang, O. Suaznabar, Z. Xie, J. Shen, N. Tsou, C. Lin & K. Kerenyi

**Scour hole development in river beds with mixed sand-clay-peat stratigraphy**  
Y. Huismans, G. van Velzen, T.S.D. O'Mahoney, G. Hoffmans & A.P. Wiersma

**Numerical analysis of bed elevation and bank line changes at the confluence of Nakdong and Geumho Rivers in Korea**  
E.K. Jang & U. Ji

**Analytical design for stable channel geometry of Naesung Stream in Korea**  
U. Ji & E.K. Jang

**An experimental study of live-bed scour at circular pier in covered flow**  
O. Lauva & A. Radice

**Flood threshold value for bridge scour prediction and warning**  
F.-Z. Lee, J.-S. Lai, K.-C. Chang, Y.-B. Lin, H.-K. Chang, W.-D. Guo, Y.-C. Tan & C.-C. Huang

*continued on the next page*

# River and estuarine erosion including scour around structures – *Continued*

## **Numerical simulations of bedrock erosion around the bridge**

C.T. Liao, K.C. Yeh, K.-W. Li, R.K. Jhong & K.W. Wu

## **A model for scour around bridge piers caused by flood waves**

O. Link, A. Pizarro, C. Castillo, B. Ettmer & S. Manfreda

## **Developments of low cost riverbank protection in Bangladesh**

K. Oberhagemann & A.M. Aminul Haque

## **Bed morphology changes at river contractions**

G. Oliveto & M.C. Marino

## **Small-scale physical modelling of scour at bridge piers with light-weight sediments**

S. Perrin, C. Keppers, S. Roux & E. Murphy

## **The development of automated spatial and temporal measurement system for lab-scale local scour**

M. Porhemmat, W.H.M. Wan Mohtar & A. El-Shafie

## **Physical modelling of debris flow deposits in contiguous confluences**

L.M. Stancanelli, E. Foti & S. Lanzoni

## **A computational approach to the study of the stability of pier riprap at the Middle Fork Feather River**

O. Suaznabar, J. Shen, N. Tsou, C. Bojanowski, S. Lottes, K. Flora, F. Jalinoos & K. Kerenyi

## **Experimental study of scour around bridge piers of different arrangements with same aspect ratio**

B.A. Vijayasree & T.I. Eldho

## **Feature of the vortex and the jet flows around and inside the three-row pile group**

A.V. Voskoboinyk, V.A. Voskoboinick, O.A. Voskoboinyk, L.M. Tereshchenko & I.A. Khizha

## **Pressure fluctuations on the scour surface before prismatic pier**

V.A. Voskoboinick, A.V. Voskoboinick, O.O. Areshkovych & O.A. Voskoboinyk

## **The influence of upstream weir slope on live-bed scour at submerged weir**

L. Wang, B.W. Melville & H. Friedrich

## **Effect of densimetric Froude number on local bridge pier scour**

P. Williams, R. Balachandar & T. Bolisetti

## **Incipient motion of sediment in rectangular open-channel flow with a submerged rigid vegetation zone**

W. Xue, S. Wu, X. Wu, J. Zhou & J. Dai

# Sediment transport: Grain scale and continuum scale

**Feed-back on the development of a small scale contact erosion test in the laboratory (characteristic size ~30 cm)**  
R. Beguin, P. Pinettes, C. Picault, L. Duchesne & J.-R. Courivaud

**Local mechanisms of cohesive soil erosion**  
F. Brunier-Coulin, P. Cuéllar & P. Philippe

**Changes in soil deformation and shear strength by internal erosion**  
C. Chen, L.M. Zhang & D.S. Chang

**Core crack-filling by upstream gap-graded soils in zoned dams**  
R. Correia dos Santos, L. Caldeira & E. Maranha das Neves

**Micromechanical features of jet erosion—a numerical perspective**  
P. Cuéllar, L.-H. Luu, P. Philippe, F. Brunier-Coulin, N. Benahmed, S. Bonelli, J.-Y. Delenne & J. Ngoma

**The importance of permeability in granular filter design and control**  
F. Delgado-Ramos, D. Escudero-Merino & C. Olalla

**Experiments on submerged slope erosion under unsteady water head**  
X. Liang, L. Xie & Y. Zhu

**Scour of soil with dynamics interactions among soil-water induced by jet flow**  
T. Matsuda, K. Maeda & A. Yamaguchi

**The hydrodynamics of a recirculating (O-tube) flume**  
H. Mohr, S. Draper, D.J. White, L. Cheng, H. An & Q. Zhang

**Development of a new submersible test to characterise the erosion of soils and sediments**  
O. Ndoye, C. Chevalier, P. Reiffsteck, C. Minatchy, S. Fanelli & D. Pham Van Bang

**Mechanics and simulations of the groundsill damage due to the impacts from pebbles/cobbles**  
Y.-W. Pan, K.-P. Leong, J.-J. Liao & C.S. Ku

**Modification of an erodibility category limit for the pocket erodometer**  
R. Rahimnejad & P.S.K. Ooi

**Experimental investigations of critical hydraulic gradients for a soil prone to suffusion**  
M.R. Salehi Sadaghiani, K.J. Witt & B. Odenwald

**Stability of wide-graded granular filters under oscillatory flow**  
D. Schürenkamp, H. Oumeraci & J. Kayser

**Relationship between soil erodibility and engineering properties**  
I. Shafii, J.-L. Briaud, H.C. Chen & A. Shidlovskaya

*continued on the next page*

# Sediment transport: Grain scale and continuum scale – *Continued*

**Calibration of erodibility testing devices for bridge design support**  
H. Shan, O. Wiblishauser, C. Lin, J. Shen & K. Kerenyi

**Measurement of constriction size distributions using three grain-scale methods**  
T. Shire, C. O'Sullivan, H.F. Taylor & W.W. Sim

**Non-dimensional formulization of the critical hydraulic head difference for seepage failure of soil in front of sheet piles**  
T. Tanaka & T. Miki

**The consistency of laboratory jet erosion tests performed on undisturbed samples**  
J.L. Wibowo & B.A. Robbins

**Development of experimental methodology of investigating the relative and interactive effects of physicochemical properties of permeating fluids on incipient motion of granular particles**  
M. Xiao & B.T. Adams

**Variation of small strain stiffness for piping-influenced Toyoura sand**  
Y. Yang, R. Kuwano & X. Chao

**A field erodibility testing device for scour evaluation of bridges**  
M. Zinner, T. Meyer, H. Shan, J. Shen, B. Bergendahl & K. Kerenyi

# Terrestrial scour and erosion

## **Investigation into the multiple recent sinkholes in Pokhara, Nepal**

R. Kuwano, T. Kiyota, R.M. Pokhrel, T. Katagiri, T. Ikeda, Y. Yagiura, T. Yoshikawa & J. Kuwano

## **Model tests on subsurface cavities below road pavement due to sand eruption from the liquefied ground**

J. Kuwano, R. Kuwano & Y. Horiuchi

## **Application of SWAT model to estimate the annual runoff and sediment of Duhok reservoir watershed**

M.E. Mohammad, N. Al-Ansari & S. Knutsson
